

PMATH 450/650 – Fourier Analysis and Lebesgue Measure

Instructor: Michael Brannan

Office: MC 5447

Email: michael.brannan@uwaterloo.ca

Course Website: <https://learn.uwaterloo.ca/>

Lecture Time: TBA

Office Hours: TBA

TA: TBA

Course Outline: This course provides an introduction to the basic results of Fourier analysis (Fourier series on the circle and Fourier transforms on the line). For this to be done rigorously, one also needs to learn some tools and results from measure theory and integration on the real line. The course therefore is divided into three main parts:

- (1) Lebesgue measure and integration on the line: Lebesgue outer measure, Carathéodory's theorem, the Lebesgue integral, monotone and dominated convergence theorems, the Banach spaces L^1 , L^2 , and L^∞ , completeness and dense subspaces. Hilbert spaces, orthonormal bases.
- (2) Fourier analysis on the circle: Fourier series, the Dirichlet kernel, the Riemann-Lebesgue lemma, Fejér's theorem, pointwise convergence of Fourier series, L^2 -convergence of Fourier series, Plancherel theorem.
- (3) Fourier transforms on the line: L^1 - and L^2 -Fourier transforms, convolutions, the Fourier algebra, L^1 -inversion theorem, Plancherel theorem.

Recommended Textbooks: There is no required textbook for this course. The lectures will be self-contained (and copies of my lecture notes will be posted after each class). Students may find the following optional textbooks useful as additional resources.

- H.L. Royden, *Real Analysis*, Prentice-Hall, multiple editions.
- A.M. Bruckner, J.B. Bruckner and B.S. Thomson, *Real Analysis*, Prentice Hall, 1997. classicalreanalysis.info/Free-Downloads.php
- K. Davidson and A. Donsig, *Real Analysis with Real Applications*, Prentice Hall, 2002.
- Y. Katznelson, *An Introduction to Harmonic Analysis*, Cambridge Press, 2004.

PMATH 450/650 Grading Scheme	Homework	40 %
	Midterm Test (in class)	20 %
	Final Exam	40 %

Assignments: There will be approximately 5 regular assignments, due every other week. These will be posted on the course Learn site. All assignments should be uploaded to the CrowdMark site for MATH 451 by the deadline (11:59PM on the due date). An assignment is considered late if it is submitted more than 24 hours past the deadline.

Late assignments will be penalized, and possibly not be graded.

Examinations: The final examination will take place in-person and is to be scheduled by the registrar. Do not miss the exam unless it is a medical emergency. Documentation is required and could consist of a self-declaration of illness:

<https://uwaterloo.ca/quest/help/students/how-do-i/self-declare-my-illness>

Missed final exam: An incomplete is only an option if there is a legitimate reason for missing the exam (generally a medical emergency) *and* the term work has been satisfactory.

Missed lectures: Students are expected to attend every lecture. If a lecture is missed due to an illness, or for purposes of self-isolation due to COVID-19 exposure, lecture notes will be made available to the student upon request.

Crowdmark: You sign in to Crowdmark using Learn. Crowdmark is a system for uploading questions online so that graders have easy access to your solutions, and you have easy access to their comments. Each question should be scanned or photographed separately, and uploaded into the appropriate section for that question. Students experience serious time delays when they attempt to do this close to deadline, resulting in late work. I recommend uploading each question once you think it is complete. If you change something, you can delete and add a new solution as long as you have not submitted. Be sure to save after each change. For more information, see:

<https://crowdmark.com/help/categories/support-for-students/>

Note: When uploading to crowdmark, you can delete and resubmit solutions to questions as many times as you like. However, once the deadline has passed, you can only upload your solution once.

The University Senate mandates that every course outline must contain the following text.

Academic Integrity: In order to maintain a culture of academic integrity, members of the University of Waterloo community are expected to promote honesty, trust, fairness, respect and responsibility. Check

www.uwaterloo.ca/academicintegrity/

for more information.

Grievance: A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. Read *Policy 70, Student Petitions and Grievances, Section 4*,

<http://www.adm.uwaterloo.ca/infosec/Policies/policy70.htm>.

When in doubt please be certain to contact the department's administrative assistant who will provide further assistance.

Discipline: A student is expected to know what constitutes academic integrity to avoid committing academic offenses and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offense, or who needs help in learning how to avoid offenses (e.g., plagiarism, cheating) or about "rules" for group work/collaboration should seek guidance from the course professor, academic advisor, or the undergraduate associate dean. For information on categories of offenses and types of penalties, students should refer to *Policy 71, Student Discipline*,

<http://www.adm.uwaterloo.ca/infosec/Policies/policy71.htm>.

For typical penalties check *Guidelines for the Assessment of Penalties*,

<http://www.adm.uwaterloo.ca/infosec/guidelines/penaltyguidelines.htm>.

Appeals: A decision made or penalty imposed under *Policy 70, Student Petitions and Grievances* (other than a petition) or *Policy 71, Student Discipline* may be appealed if there is a ground. A student who believes he/she has grounds for an appeal should refer to *Policy 72, Student Appeals*,

<http://www.adm.uwaterloo.ca/infosec/Policies/policy72.htm>.

Students with disabilities: The *Office for Persons with Disabilities* (OPD), located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the OPD at the beginning of each academic term.
