Are you an adult with an AUTISM SPECTRUM DISORDER (ASD)?

The Face Processing & Social Cognition Lab is looking for high-functioning adults with an autism spectrum disorder (ASD) aged 18 to 45 to take part in a study on face recognition and social functioning.

Participants will complete a variety of activities (e.g., computer tasks, paper tasks, face-to-face interview, questionnaires) using behavioural and neuroimaging techniques (EEG, eye-tracking). The study involves two sessions (each about 3 hours in length) completed approximately 1 week apart. Participants will receive up to $80 cash in appreciation of their time.

If you would like more information, or are interested in participating, we would love to hear from you! Please contact the researcher, Karisa Parkington, by email at kparkington@uwaterloo.ca or by phone at (519) 888-4567 ext 38872 to determine your eligibility.

This study has been reviewed by, and has received ethics clearance through, a University of Waterloo Research Ethics Committee.
