

AGM Web Report (2016)

This year, in addition to the WCMS software, an online reservation Ticketfi has been added to the retirees web site. Ticketfi helps to analyze the attendees' attendance patterns, trends, and sources of engagement. It also generates online graphical reports which can be exported to excel for analysis.

This website has the most up-to-date information on UWRA news and events, usually in advance of other publications. A FaceBook page has been added which contains photo albums of the various UWRA activities, and a "Contact us" option which provides an easy way to contact the board members with questions or comments. Fillable PDF files are still available for some events but will be replaced with the online reservation forms provided by Ticketfi for the coming year. Information on the coach tour program, the spring and fall luncheons and the annual fall reception is also available on the site.

You can also find contact details for the UWRA board members, the UWRA newsletters in colour, UW computer account and other links to resources of interest to retirees.

If you feel there are other issues of interest to the retirees that you would like to see on the website, please contact a board member. To view the website, go to <http://retirees.uwaterloo.ca/>
