

## **Bringing Statistics to the Learner: Tailoring Material to Match Student Passions**

**When you have trouble reaching some of your students, is the course...**

Required, elective, or a mix?

Restricted to students in certain programs or open?

Relevant to the students' programs? Their careers? Their personal interests?

Related to their other courses, past or future?

**How can you gradually make additions to your course?**

One change you can make in your course right away

One change you can think about making in the future

**Who or what can you use for inspiration?**

One person you can go to for ideas

One resource you can consult for ideas

**How will you know it is working?**

One goal you have

One idea for measuring the success of your changes
