INDEV 617 Field Course

Research in Practice – MDP Field Visit

Exploring the Jamaican Food System through Cuisine

WINTER TERM, 2019

Instructor  Bruce Frayne, SEED  bfrayne@uwaterloo.ca
Field Coordinator  Cheri Oestreicht, SEED  cmoestreich@uwaterloo.ca

EXPERIENTIAL LEARNING CONTEXT

The purpose of this field trip is to gain exposure to the Jamaican development context. Our approach to the field experience is through a ‘food lens’. By looking at society through this food lens, we have the potential to gain an understanding of how the food system works, and in so doing, also to develop a perspective about food and nutrition security in the area of our site as well as more broadly in Jamaica and beyond.

LEARNING OUTCOMES

The course is designed to provide the following learning outcomes:

1. Understand the basics of transformative scenario planning by using the U-Method in practice. This method is a useful tool in development practice, where complex, system problems are at the core of the issues under consideration.

2. Understand elements of the Jamaican food system and how these interact to create the food and nutrition security outcomes observed in the field.

3. Contextualize the food system report for Kingston, Jamaica prepared by the Hungry Cities Partnership.

FIELD METHOD

The methodology we will use is known as transformative scenario planning. In real life, this innovative methodology is used to help diverse groups of stakeholders find ways to positively influence complex development problems. On this field trip we will employ the U-process as part of transformative scenario planning. This U-process helps us to focus on development questions through the food security lens and is structured around three learning phases and the development and utilization of seven capacities.
LEARNING BY DOING

We will experience this method as we implement it in the field.
The itinerary for the field experience is structured to reflect the U-process’ three learning phases and the development and utilization of the seven capacities.

1) SENSING Transforming perception
2) PRESENCING Transforming self and will
3) REALIZING Transforming action

RESOURCES

In preparation for the field trip, please review the following resources:

**Documentary**  Life and Debt  
Available at library/online

**Organization**  [http://reospartners.com/](http://reospartners.com/)  
To get a better sense of how transformative scenario planning works, familiarize yourselves with Reos Partners’ work around the world as examples of this method in action (hint: Reos has done scenario planning for Waterloo).

**Readings**  

*The Urban Food System of Kingston, Jamaica*, Hungry Cities Partnership.

**Talk**  
[How To Change the Future](#) - Adam Kahane

For those of you who become interested in this methodology, you should get a copy of the following book:

CONTACT DETAILS

Location  Brown’s Town, Jamaica

Dates  18-24 February 2019

Accommodation  Hillcrest Diocesan Retreat Centre
Saint Christopher’s Crescent
