FALL 2020

Instructor: Dr. Komal Habib (komal.habib@uwaterloo.ca)

Dr. Habib’s Office: EV3 4247

Virtual Office Hours: Tuesdays and Thursdays 1:00pm-2:00pm by appointment, also available to schedule appointments at another mutually agreed upon time.

Delivery of Course Material: Material for this course will be delivered by the LEARN system. Go to https://learn.uwaterloo.ca/

COURSE DESCRIPTION

Industrial ecology is the systematic analysis of global, regional and local material and energy flows that are associated with products, processes, industrial sectors, and economies. Included in these analyses are energy consumption, non-renewable and renewable materials consumption, air pollutant emissions, waterborne pollutant effluents and solid waste generation associated with human activities. These analyses are the foundation of industrial ecology, which seeks to design and manage products and services that meet human needs in a more sustainable manner. This course will familiarize you with the vocabulary and analysis techniques used to assess and improve product systems.

LEARNING OUTCOMES

By the end of this course, you should:

- Be able to assess/evaluate environmental impacts of a product system
  - Understand and quantify material and energy flows
  - Calculate performance metrics
  - Critique/evaluate claims
  - Locate and select appropriate data to construct flow diagram for a simple product system
  - Interpret flow diagrams
- Acquire skills necessary for professional competence
  - Demonstrate facility with disciplinary vocabulary
  - Demonstrate facility with data and their manipulation

READINGS

As there is no textbook for this course, all readings will be assigned during the term through LEARN. These readings come from a combination of peer-reviewed academic literature and ‘grey’ (not peer-reviewed) literature and web sites. Complete citations or web links will be provided for all readings. It will be demonstrated how to search on electronic journal databases to obtain readings in lecture.

POLICY ON LATE SUBMISSIONS

Submissions received up to 24 hours after the due date and time indicated above will have a 10 per cent penalty applied to them (of the 100 available per cent for that assignment). Submissions received 24-48 hours AFTER the due date and time indicated above will have a 20 per cent penalty applied to them (of the 100 available per cent for that assignment). Students not handing in their submissions within TWO DAYS of the due date and time will receive a mark of zero on that assignment. Exceptions will be made in extraordinary circumstances (usually related to medical emergencies supported by documentation). Students anticipating that their assignment will be submitted late are encouraged to contact the course instructor at the earliest possible time.

PROTOCOL FOR CONTESTING GRADED ASSIGNMENTS

Upon receipt of your graded assignment should you wish to contest the grading of your assignment (outside of simple errors in the addition of marks) the following protocol must be followed:

1. Read comments provided thoroughly.
2. After 24 hours, submit an email to the course instructor detailing why your assignment warrants a review. Please be sure to provide specific examples and justification as to why you feel your grade should be reconsidered.
3. The instructor will then review the stated reasons and decide whether re-grading of the assignment is warranted.
4. Should the instructor deem that re-grading is warranted, the instructor will then ask the student whether they would like their assignment re-graded, recognizing that the student’s grade could go up or down depending on the instructors’ assessment.
5. The student can choose to either have the instructor go ahead with re-grading the entire assignment or stick with their original grade.
