# Content Modules

## Module One: Structuring and Scoping Your Project

### Learning Objectives

By the end of Module One you will be able to

- develop research objectives relative to client's problem,
- define project scope,
- reflect on validity of scope and structure of project, and
- provide feedback to classmate.

#### Week 1: Research Questions

Web Page

#### Week 2: Project Scope

Web Page

#### Week 3: Project Scope (continued)

Web Page

## Module Two: Reviewing Published Literature

### Learning Objectives

By the end of Module Two you will be able to

- synthesize current research on your topic and sub-topics,
- utilize the on-line library resources,
- evaluate research methods used to investigate the topic,
- recognize inconsistent and/or conflicting findings between studies,
- identify gaps in current body of knowledge and potential contributions your research can make, and
- produce an annotated bibliography.

### Week 4: Reviewing Published Research

Web Page

### Week 5: Reviewing Published Research (continued)

Web Page

### Week 6: Reviewing Published Research (continued)

Web Page

## Module Three: Developing Your Research Design

### Learning Objectives

By the end of Module Three you will be able to

- identify potential study participants,
- test a data gathering approach,
- finalize the tools (i.e. questions) you will use to gather data

- synthesize all ethical issues inherent in your research project in order to create the Team Application for Ethics Approval for your project, which includes your participant recruitment materials, data gathering instruments (interview guides, focus group or survey questions, or observation protocols) and letters of information, consent, and appreciation, and
- write the introduction, the literature review and the methodology sections of your project report in draft.

### Week 7: Research Design and Method Selection

Web Page

### Week 8: Methods Selection and Data Gathering

Web Page

### Week 9: Research Design and Research Ethics

Web Page

### Week 10: Research Design and Research Ethics (continued)

Web Page

### Week 11: Research Design and Research Ethics (continued)

Web Page

### Week 12: Research Design (continued)

Web Page

## Module Four: Gathering and Analyzing Data

### Learning Objectives

By the end of Module Four you will be able to

- gather data to address your topic,
- analyze data to produce findings,
- interpret your findings in the context of prior research,
- generate insights into your topic,
- create a draft Findings/Results and Discussion sub-section, and
- provide a classmate with constructive feedback on their draft.

### Week 13: Data Gathering

Web Page

---

### Week 14: Data Analysis

Web Page

---

### Week 15: Data Gathering and Analysis (continued)

Web Page

---

### Week 16: Data Gathering and Analysis (continued)

Web Page

---

### Week 17: Data Gathering and Analysis (continued)

Web Page

## Module Five: Reporting and Presenting Your Project

### Learning Objectives

By the end of Module Five you will be able to

- justify recommendations suggested by your findings,
- demonstrate your contribution to the area of sustainability,
- integrate your research project findings with your individual learning and aspirations, and
- defend orally and in writing the conclusions of your research.

### Week 18: Reporting and Presenting Your Project
