

J. Efrim Boritz
CURRICULUM VITAE
April 2022

My work involves investigating areas of professional practice in external auditing and internal auditing which rely on the exercise of professional judgment, particularly in the context of information systems. My research aims at identifying factors affecting judgment processes and systematic determinants of judgment quality. I am particularly interested in judgment enhancement through improvements in the quality of the information and models used by professionals.

Boritz, J.E., “CAPS: The Comprehensive Audit Planning System: A Micro-Computer-Based Decision Support System for Internal Audit Planning” *Centre for Accounting Research and Education*, University of Waterloo, Technical Report #1, March 1984, 65 pages.

Software DevelopmentAuditMASTERPLAN - A Decision Support System for Internal Auditors

(developed under sponsorship of the Institute of Internal Auditors, Altamonte Springs, Florida)

The conceptual underpinning for this system was developed under a research grant from the Institute of Internal Auditors Research Foundation which led to the publication of the research monograph entitled: *Planning for the Internal Audit Function* in 1983. Subsequently, a prototype micro-computer based system was developed, leading ultimately to a commercial package released in 1987. It is the best known planning system for internal audit departments, and is used by internal audit organizations throughout the world.

Some aspects of the theory underlying the system are described in Boritz, J.E. and D.S. Broca, “Scheduling Internal Audit Activities”, *Auditing: A Journal of Practice & Theory*, Fall 1986, pp. 1-19. Some operational and implementation aspects of the system are described in Chapter 12 of

G. Courtemanche's book *Audit Management and Supervision*, New York: John Wiley, 1989, pp. 232-274.

CAPEX - Canadian Audit Planning Expert System

(developed under sponsorship of Peat Marwick, Canada and the Government of Ontario under its University Research Incentives Funding program)

This is a research prototype of an audit planning expert system (for planning substantive tests of financial items at the assertion level) implemented on a Unix-based DEC workstation using Prolog, X-windows, and C.

The theory underlying the system is described in Boritz, J.E. and A.K.P. Wensley, "An Expert Systems Approach to Substantive Audit Planning", *Expert Systems with Applications*, Vol. 2, p. 27-49, 1991 and Boritz, J.E. and A.K.P. Wensley, "Structuring the Assessment of Audit Evidence - An Expert Systems Approach", *Auditing: A Journal of Practice & Theory*, Supplement 1990, pp. 49-87.

System validation is described in Boritz, J.E. and A.K.P. Wensley, "Evaluating Expert Systems with Complex Outputs: The Case of Audit Planning", *Auditing: A Journal of Practice & Theory*, Fall 1992, pp. 14-29.

Rule Based System for Inherent Risk Assessment

This is a research prototype of an inherent risk assessment system implemented on a DOS-based IBM compatible system using the VP-Expert programming shell. The system is described in Boritz, J.E., A. Albuquerque and R.G. Kielstra, "A Prototype Expert System for the Assessment of Inherent Risk and Prior Probability of Error", Chapter 5 in H.M. Armitage and J.E. Boritz (eds.), *Decision Support and Expert Systems for Management Accountants*, Society of Management Accountants of Canada, 1991.

Risk Alert (Going Concern Expert System)

Developed under sponsorship of the Canadian Institute of Chartered Accountants and the Government of Ontario under its University Research Incentives Funding program. Elements of the approach are discussed in Boritz, J.E., *The Going Concern Assumption*, Research Report, Toronto: Canadian Institute of Chartered Accountants, 1991.

Project with Ministry of Finance School of Fiscal Administration, Brazil and Canadian International Development Agency, January 1985-December 1990.

I served as director of the project that implemented computer-assisted auditing facilities and provided training to over 120 auditors and management personnel in Brazil. Of these trainees, 30 received additional specialist training in Canada. Also, one of the trainees went on for further academic study, earning a MAsc. degree in Information Systems from the University of Waterloo in 1990. The project is described in Boritz, J. E., "Bye, Bye Brazil", *CA Magazine*, November 1989, pp. 36-43.
