Over the next ten years, the School of Accounting and Finance at the University of Waterloo will leverage our people and the University’s strengths. This will align our combined resources and energy towards our mission:

**Transforming the professions, world-class research and experiential education**

As a School composed of students, faculty and staff, we will transform the accounting and finance professions in two ways. First, through the world-class research conducted by our faculty and disseminated to the business community, policy makers and standard setters. Second, our graduates will transform the professions through the impact that they will have in their careers based on the capabilities that they develop through experiential education here at Waterloo.

Championed by local entrepreneur Tim Jackson, this Fund will provide students with an exceptional experiential learning opportunity in the field of venture capital by learning how to invest in start-up companies.

The Student Investment Fund provides exceptional learning opportunities for finance students and offers real-world investment experience in an academic setting.

A state-of-the-art Finance & Analytics Lab is a high profile, integral part of the School’s academic programs that is used for classes, seminars, the Student Investment Fund, and extra-curricular activities.
The Fellowship program attracts strong high school students as leaders and acknowledges their abilities and potential.

Scholarships and awards make a significant impact on a young person’s education; especially today, as many students and families are coping with the cost of professional education.

In today’s globalized economy, there is an increasing demand for people who: understand how international business works, have demonstrated experience in global activities, have shown adaptability to operate in different cultures and have embraced opportunities to learn about business at a global level.

The Alumni Endowment Fund allows School leadership to anticipate and respond to change.

The Centre supports projects designed to enhance the teaching of ethics to accounting students and the research of ethical issues in accounting.

The Centre promotes the goals and objectives of the University and the School, through highlighting our commitment to excellence in the areas of fundamental and applied accounting and finance research, and in accounting and finance education.

*University of Waterloo: To be recognized as one of the most innovative universities in the world*
