---

May 21, 2024

Mike Grivicic
Associate University Secretary
Present: Joan Coutu, Laura Deakin, Catherine Dong, Vivek Goel (chair), Mike Grivicic (secretary), Christiane Lemieux, Rory Norris, David Porreca, Luke Potwarka, Mary Robinson, James Rush, Sharon Tucker

Guests: David DeVidi, Jenny Flagler-George, Genevieve Gauthier-Chalifour, Diana Goncalves, Andrea Kelman, Tim Weber-Kraljevski

Regrets: Jeff Casello, Jack deGooyer, Carol Ann MacGregor, Clarence Woudsma

1. MINUTES OF THE MARCH 25, 2024 MEETING AND BUSINESS ARISING
A motion was heard to approve the minutes as distributed. Porreca and Deakin. Carried. There was no business arising.

2. RECOMMENDATION RE: ACADEMIC QUALITY ENHANCEMENT COMMITTEE
DeVidi spoke to the report and recommendation: formation of this committee aims to elevate the academic quality function, with greater focus and improved feedback, while also yielding bandwidth at the Graduate & Research Council as well as at Undergraduate Council to allow greater attention/focus on strategic items at those bodies; this recommendation is an outcome of the Senate Governance Review and the committee/councils’ reflective exercise; comparator institutions have had similar bodies for this function for some time. The chair emphasized that this function is important for maintaining and enhancing the quality of academic offerings, and that while this function is carried out autonomously by Ontario institutions this is not the case in other jurisdictions. Members noted a minor typographical error to be remedied for the version of the report going to Senate. A motion was heard to recommend that Senate approve the creation of the proposed Academic Quality Enhancement Committee, as amended. Deakin and Dong. Carried.

3. RECOMMENDATION RE: FILLING VACANCIES ON SENATE COMMITTEES/COUNCILS
This report was distributed separately from the agenda, and it was noted that the earlier timelines for filling in the committee/council membership will be targeted in 2025. A motion was heard to acclaim the membership of Senate committees and councils as presented on the attached list of nominees. Porreca and Deakin. Carried.

4. GUIDELINES FOR VISITORS TO SENATE MEETINGS
Gauthier-Chalifour spoke to the draft document: seeking initial feedback and comments from the committee today with the intent of bringing forward a finalized draft at an upcoming meeting; recommendation would have the chair approve representations on the advice of SEC, with a provision to give preference to accredited/recognized groups from the University community. Members discussed: establishing guidelines could in itself generate more representations at Senate and thereon skew where Senate devotes its attention; measures included within the guidelines would aim to mitigate the potential for abuse; SEC would be able to reroute requests to other governance bodies. A revised version of the guidelines will be brought forward to the next meeting.

5. DRAFT APRIL 8, 2024 SENATE AGENDA
Members discussed the draft agenda and highlighted: item under Business Arising from the Minutes will move under the President’s Report; Porreca will meet with Casello and others with regard to 8(c); item 11(a) will be removed, in light of the discussion at this meeting; the report from the COU academic colleague will be moved into the regular agenda, with Kline to be invited to speak to the report. A motion was heard to approve the May 6, 2024 Senate agenda, as amended. Porreca and Norris. Carried.

6. OTHER BUSINESS
There was no other business. With no other business, the committee moved into confidential session.

The next meeting of the committee will be Tuesday May 28, 2024 from 3:30-4:30 p.m.

May 14, 2024

Mike Grivicic
Associate University Secretary
This page intentionally left blank.
Summary:

In November 2021, the Senate Executive Committee discussed the prospect of undertaking a Senate Governance Review (SGR), inspired by a similar exercise undertaken by the University’s Board of Governors. The committee agreed to proceed with a review, with an eye to improving Senate’s governance and operation. Members identified a number of potential benefits in such an exercise which they believed would lead to improvements, including:

- making Senate discussions more strategic
- streamlining meeting frequency
- finding opportunities for better connections with the Board of Governors
- refining agenda materials
- generally enhancing Senate’s function and operations

In January 2022, Senate approved the Terms of Reference for the work of the review and in June 2022 the Senate Executive Committee submitted its Report to Senate with Recommendations, which were endorsed by the senior body. Since that time, progress has been made to implement and act upon the various recommendations. The considerable diversity in the nature and scope of the recommendations is reflected in the varied approaches taken to address the proposals; this is necessary to ensure that the relevant stakeholders are involved in both the formulation and implementation steps, as appropriate, and with support from the Secretariat for procedural and governance matters.

The following serves as an update report on progress against the recommendations as well as ongoing planned next steps. The progress and actions taken are outlined in the tabulations below, reflecting coordinated efforts between the Senate and its committees along with support from the Secretariat where appropriate. While some activities have been relatively straightforward to implement, others are necessarily more time-intensive with progress coming after considerable discussion and reflection by stakeholders.

**Overall Progress**

The majority of the recommendations have either been addressed in full or have a defined timeline for completion. The remaining recommendations to be addressed are expected to be actionable and likely completed by the end of the current Senate cycle (April 2025). Since the 2022 Report, additional activities have been identified which align with the governance review activity but were not expressly contemplated as part of that exercise. These will also be addressed in tandem with the review’s recommendations in the spirit of continuous improvement.
### Status List of Recommendations Actioned

</tr>
</tbody>
</table>

The objectives of the SGR will continue to be applicable on an ongoing basis following the completion of SGR implementation. The goals of the SGR are evergreen, and so all Senators, members of Senate committees and councils, as well as staff providing professional support from within the Secretariat are encouraged to be mindful of opportunities for continuous improvement to Senate governance. Feedback will also continue to be sought annually through the Senate Evaluation Survey.

**Governance Pathway:**
- Endorsement of SGR (Senate, June 2022)
- SGR progress update report (Senate Executive Committee, May 2024)

**Attachments:**
- Senate Governance Review, Appendix G – Chart of Recommendations and Accountability
1. **General**

These Guidelines are intended to outline attendance expectations for visitors to meetings of the University of Waterloo Senate and its standing committees and councils. It is the expectation that the business of these meetings can proceed appropriately and with full attention to a comfortable, safe and secure environment for all meeting participants.

These Guidelines describe measures that are consistent with the *University of Waterloo Act, 1972* (“the Act”), as amended, Senate Bylaws and other University policies and protocols addressing individual conduct, safety and security.¹

2. **Authority**

Section 27(1) of the Act requires that meetings of Senate be open to the public

...the meetings, including committee meetings of the Board of Governors and of the Senate shall be open to the public, prior notice of the meetings of the Board of Governors and of the Senate shall be given to the members and to the public in such manner as the Board of Governors and the Senate by by-law shall determine, and no person shall be excluded therefrom except for improper conduct...

Senate Bylaw 1, s.6.02, provides that, “Non-members in attendance at meetings shall not disrupt the proceedings of the meeting nor cause any disturbance by unreasonable noise or vocal expression. The chair may remove any such person when, in the chair’s sole judgment, such person is engaging in improper or disruptive conduct that is detrimental to Senate carrying out its business.”

The Act, and Senate Bylaw 1, provide for circumstances in which a meeting of Senate or its committees and councils is held in closed session, “for the purpose of considering confidential financial matters of the university of where intimate financial or personal matters of any person may be disclosed”.²

3. **Registration of Attendance**

3.1. Visitors who wish to attend and observe proceedings of the open session of a Senate or Senate standing committee or council meeting must register with the Secretariat in advance of the meeting.

3.2. In cases where the number of visitors wishing to attend an open session meeting exceeds the physical capacity of the meeting room, space will be granted to individuals in order of their advance registration with the Secretariat until such time as the meeting has commenced, and thereafter to individuals in order of their arrival at the meeting.

3.3. Visitors may be required to sign-in upon arrival at the meeting and the names provided through this process may be listed among the attendees included in the official minutes of the meeting.

4. **Representations to Senate**

4.1. Members of the University community wishing to make representations to a meeting of Senate must file their request with the Secretariat, in writing, by noon on the day of the Senate Executive Committee

---

¹ [https://uwaterloo.ca/secretariat/policies-guidelines-signing-procedures](https://uwaterloo.ca/secretariat/policies-guidelines-signing-procedures)

² Senate Bylaw 1, s.7
meeting that precedes the scheduled regular meeting of Senate, as published on the Secretariat website, and include the nature of the proposed representation. Requests should specify how the subject of the proposed representation falls within the jurisdiction of Senate, and also shall include reference to other internal and/or governance bodies previously engaged in the matter, as appropriate.

4.2. Requests are considered by the Chair of Senate on advice of the Senate Executive Committee, and granted with approval from Senate when the agenda is considered.

4.3. Speakers are required to limit their remarks to five minutes.

4.4. Speakers shall avoid personal attacks or offensive references to any individual.

4.5. A maximum of fifteen minutes may be devoted to representations from individuals and groups who wish to address the members of Senate. These statements will normally be heard following dispensation of the minutes.

4.6. If more than three requests for representations are received for a given Senate meeting, they will be considered in the order received with priority to be given to recognized associations and groups from the University community, as well as to requests pertaining to items of business on the meeting agenda.

4.7. An individual or group may bring a representation to Senate on a given subject once in a Senate meeting cycle (May 1 to April 30).

4.8. The Chair of Senate and/or Senate Executive Committee may exercise discretion to appropriately direct the request to a committee or council of Senate or to another governance body.

4.9. The Senate Executive Committee has the authority to adapt the process outlined in these guidelines in cases where its application is uncertain.

5. **Representations to Senate Standing Committees and Councils**

5.1. Senate Bylaw 1, s.9.01, provides that “Any members of the university community, or of the public-at-large, wishing to make representations to any meeting of a committee or council shall file with the secretary of the relevant committee or council, at least two full working days prior to the date of such proposed meeting, written notice to that effect with such notice to designate the nature of the proposed representations.”

5.2. Requests for representations to a Senate standing committee or council will be considered by the respective chair and granted with approval from the committee when the agenda is considered.

5.3. The provisions in sections 4.3 to 4.8 of these guidelines shall also apply in the case of representations to a Senate standing committee or council.

6. **Order and Decorum**

6.1. As the presiding officer of the meeting, the Chair is responsible for maintaining order and decorum at meetings.

6.2. Only duly appointed and elected members of Senate and its standing committees and councils may participate in debate and/or sit at the table. Members of senior administration and/or resource persons who attend meetings of Senate or a standing committee or council to facilitate its work may be called upon to respond to questions. Visitors to meetings do not have speaking privileges unless otherwise provided by the Chair.

6.3. Interference with the progress of a meeting by a visitor will not be permitted and any visitor who attempts to impede the business of the meeting will be instructed by the Chair to leave.

---

3 Senate Bylaw 1, s.9.01 is specific to standing committees and councils of Senate, and does not apply to the body of Senate as a whole.
7. **Recording of Meetings**

Audio and/or video recording or transmittal of meetings is not permitted. The Secretariat may cause the meeting to be recorded for minute-taking purposes. Such recordings will be held confidentially and securely on University-supported servers and destroyed following approval of the respective minutes.

8. **Contact**

Questions related to these guidelines should be directed to the Secretariat at senate@uwaterloo.ca.

Agenda Item Identification: 4) Reports - Senate Executive Committee: Election to Senate Committee on Behalf of Senate

Motion:
On behalf of Senate, to elect Natalie Doan as the graduate student representative from the Faculty of Health on the University Committee on Student Appeals, term to 30 April 2025.

Summary:
At the meeting of April 8, 2024, Senate approved the membership of Senate committees and councils and further delegated approval for any remaining or subsequent vacancies to the Senate Executive Committee.

The president of the Graduate Student Association was asked to recommend the student nominee to fill this UCSA vacancy.

OPEN SESSION

The chair welcomed Senators to the meeting and offered remarks:

- A special welcome to new Senators as well as those returning to Senate after a time away
- Upcoming observances include the National Day of Awareness for Missing and Murdered Indigenous Women, Girls, and Two Spirit Peoples (also known as “Red Dress Day”)
- Convocation ceremonies upcoming in June, and watch for communications and opportunities to participate
- Recent announcement of Renison University College’s 12th president and vice-chancellor, the Rev. Dr. Marc Jerry, whose term starts on July 1, 2024

1. TERRITORIAL ACKNOWLEDGEMENT

Marcus Shantz offered a territorial acknowledgement along with a personal reflection.

2. CONFLICT OF INTEREST

Senators were asked to declare any conflicts they may have in relation to the items on the agenda. No conflicts were declared.

3. APPROVAL OF THE AGENDA, AND APPROVAL OF THE CONSENT AGENDA

The chair provided one amendment to the agenda to add a representation under item 7(b). A motion was heard to approve the agenda as presented/amended, and to approve or receive for information the items on the consent agenda, listed as items 14-19 of the Senate agenda. Porreca and Deakin. Carried.

4. MINUTES OF THE APRIL 8, 2024 MEETING

Amendments were provided to clarify under item 5 of the minutes that the research funds in question are not part of the operating budget of the University but are external funds, and to correct an error in the meeting attendance. A motion was heard to approve the minutes as amended. Newell Kelly and Porreca. Carried.
5. BUSINESS ARISING FROM THE MINUTES
The chair observed that business arising is captured under item 7(b), and that the item pertaining to the ADDS report from April is expected to be brought back to Senate at the June meeting. There was no further business arising.

6. TEACHING AWARD WINNERS
   a. Carol Hulls – recipient of the Distinguished Teacher Award
   Jeff Casello introduced Professor Carol Hulls, who provided a short presentation: fostering growth in students by setting appropriate challenges; importance of finding ways to get students to think of the world around them; emphasis on universal design, and the potential for Waterloo to have a charter for accessibility and inclusion; sincere congratulations to all teaching award recipients.

   b. Shannon Kennelly – recipient of the Amit & Meena Chakma Award for Exceptional Teaching by a Student
   The recipient was unable to attend the Senate meeting.

7. REPORT OF THE PRESIDENT
   a. President’s Update. Goel provided his report and offered the following:
   - Recent federal budget included $2.4 billion to support AI in Canada, for which it is expected a portion will be accessible to researchers for computation services.
   - Federal parliamentary committees currently have studies underway on the distribution of federal research funding between different types of institutions, and also on Islamophobia and anti-Semitism.
   - Provincially, the government introduced Bill 166 and gives the Minister of Colleges and Universities new directive powers to require universities and colleges to have policies on student mental health, anti-racism/anti-discrimination and tuition/fee transparency.
   - New Ontario housing bill will exempt publicly-assisted institutions from the Planning Act and allows student housing plans/proposals to be developed on an accelerated basis.
   - Recent event to celebrate Chancellor Dominic Barton, and new podcast hosted by the Chancellor exploring the Global Futures.

   Members clarified: Bill 166 would allocate directive powers to compel institutions to have policies in the identified areas; as consultation proceeds on the campus planning process and plans for property developments on all campuses are made, there will be contemplation of potential shared developments with campus stakeholders.

   b. Reporting to follow up from Senators’ requests at April Senate Meeting
   Goel noted that the ongoing conflict in Gaza is a significant topic in the Waterloo community and around the world. The University supports individual and collective rights, including the right to protest, while emphasizing the importance of maintaining a safe environment in compliance with the University’s policy framework. Toward this end, in January 2024 the University launched a task force to develop the University of Waterloo’s Principles for Freedom of Expression and Respectful Engagement. Goel indicated that the University will review its frameworks for research partnerships and will report on this at a future meeting, and that questions pertaining to the specific investments in the University’s investment funds will be considered by the Board of Governors and the appropriate committees thereof – there are existing policies and obligations around responsible investment and the consideration of environmental, social and governance (ESG) factors in making investment decisions. He noted that in previous considerations for ESG, the focus was on fossil fuels and that the University may examine ESG again with a focus on social justice issues.

   Dean offered observations re: research partnerships: academic freedom is a grounding principle for research and scholarship, including partnerships, and these activities are subject to the university’s policy on ethical conduct of research and also subject to compliance with all relevant policies, procedures, ethical requirements, and legislation; the University has strong processes that guide these partnerships and applies a set of diligence tools for assessments of partnerships; in 2019, 2020 and 2023 Waterloo led initiatives to bring leaders together across Canada to compare best practices on international partnerships and safeguarding research, and it may be useful to consider having a place for such a conversation again; there is an opportunity to develop an integrative set of guidelines and principles on partnership assessment; 21 projects were undertaken under the partnership with Technion, which ran from 2014-2022 and totaling ~$900,000.
Senators discussed: compliance with federal and provincial law does not necessarily consider the issues of research partnerships issues in the context of international law nor in the context of ethical debates; these issues deserve a more robust examination with a broader lens; compliance with the law does not necessarily consider questions of right and wrong.

Representation
Ahmad Nabil addressed the Senate as follows: noted presence of Special Constable Service at recent demonstrations, and concern that this presence unfairly impacts the protests; echoed demand for action from the University to end partnerships with Technion and to divest from companies that supply the Israeli military; question of how said partnership and investments would align with the draft values statement under consideration on the meeting agenda. Members discussed: a case could potentially be made for general divestment from companies involved in defense/arms; the rationale for questioning partnership with Technion could also be applied to those with US institutions that conduct research in the space of defence.

The delegation circulated materials to Senate with two draft motions. The University Secretary clarified that motions must be put forward by a Senator, and that in light of the meeting agenda having already been approved and the information not previously circulated for consideration, the Senate must first determine whether it is prepared to entertain the motions presented. The substance of the motions would subsequently be debated if first approved for consideration by the body.

Senate heard a motion:

That the following motions be added to the Senate agenda:

i. The University of Waterloo immediately terminate all partnership agreements, including the Strategic Research Partnership signed on 19/05/2021, with Technion Israel Institute of Technology

ii. That Senate recommend the Board of Governors divest from all weapons manufacturers and all organizations that supply military equipment to Israel; and,

That Senate recommend the Board of Governors terminate all agreements and partnerships with all weapons manufacturers and all organizations that supply military equipment to Israel; and,

The Senate recommend the Board of Governors establish strict policies and procedures for investments, agreements, and partnerships such that they abide by the University of Waterloo Values Statement, International Law, and are publicly disclosed on a quarterly basis.

Pfeifle and Sayed.

Members debated the motion: the first motion could still allow individual faculty to enter into such partnerships; some Senators did not feel there was enough information available to have informed debate on these items at this time; debate could mitigate escalation of protest activity; the topic of Technion had been discussed by Senate in recent meetings and information on the partnership has been provided; a deferral of this item would allow for more information to be gathered; assertion of Technion links to the Israeli military may garner contrary views; in other instances where geopolitical factors impacted international partnerships, those were guided by government policy; there is not currently public disclosure on specific investment assets, as the University invests via pooled funds; a Senate working group could be struck to ascertain the facts for Senate to debate, or Senate could hold a separate session to review the information available; passage of the first motion may have little effect given that no new funds have been expended in recent years; it is unclear what debate occurred at Senate with the initiation of the Technion partnership; in 2002, Canada listed Hamas as a terrorist entity under the Criminal Code and this could be included in a balanced consideration of partnerships and divestment related to the situation in Gaza.

By consensus, Senate considered motions (i) and (ii) separately. For (i), the question was put and the motion was defeated. For (ii), the question was put and the motion was defeated.
8. REPORT – SENATE GRADUATE AND RESEARCH COUNCIL
Casello provided an overview of reports (a) and (b).

   a. Major Modifications – Civil Engineering Co-Operative Program
   A motion was heard to approve the proposed major modifications to the Master of Engineering (MEng) in Civil Engineering – Co-operative Program, effective September 1, 2024, as presented. Casello and Wells. Carried.

   b. Major Modifications – Chemical Engineering
   A motion was heard to approve the proposed major modifications to the Doctor of Philosophy (PhD) and Master of Engineering (MEng) in Chemical Engineering, effective September 1, 2024, as presented. Casello and Wells. Carried.

9. REPORTS – SENATE UNDERGRADUATE COUNCIL
a. Major Modifications – Recreation and Leisure Studies and Recreation and Sport Business
Newell Kelly provided an overview of the report. A motion was heard to approve the proposed major modifications to Honours Recreation and Leisure Studies, and Honours Recreation and Sport Business, effective September 1, 2025, as presented. Newell Kelly and Liu.

   Concerns were expressed re: one course which is not in the Waterloo course calendar, as well as discrepancies in the course weightings in the draft, and also on the elimination of languages and humanities courses from the plan. The item was deferred to the next meeting pending further review.

10. REPORT – SENATE LONG RANGE PLANNING COMMITTEE
   a. Waterloo Values – Review of Draft Values Statement
   Michael Dorr and Melanie Will provided a presentation and spoke to the development of the draft statement: consultation was undertaken across the University community; mindful that values set expectations and in so doing drive behaviours; detail on the values as enunciated; plan to establish a working group to set best practices in the coming months. Members noted that some of the terminology used in the draft values statement have been politicized in the public discourse and are used here with the intent of avoiding the exclusion of members from the community. A motion was heard that Senate endorse the Values Statement as presented in the attachment to this report, and further to recommend that the Board of Governors give final approval to the same Values Statement. MacEachen and Porreca. Carried.

11. REPORT – SENATE EXECUTIVE COMMITTEE
    a. Senate Governance Review Recommendation: Academic Quality Enhancement (AQuE) Committee
    Casello provided an overview of the report and recommendation, noting that the committee will help to streamline existing processes. It was noted that the relative lack of availability of student Senators may pose difficulty in fully populating the committee, and that Senate may review this in a year’s time. A motion was heard to that Senate approve the creation of the proposed Academic Quality Enhancement Committee of Senate, as presented. Casello and Woudsma. Carried.

12. REPORT – COU ACADEMIC COLLEAGUE
    In the interest of time, this item was deferred to the next meeting.

13. REPORT – HONORARY DEGREES COMMITTEE: SPRING 2024 CONVOCATION LIST OF HONORANDS
    This item was received for information.

CONSENT AGENDA
The consent agenda was approved under item 3, with items approved or received for information.

14. SENATE WORK PLAN
    Received for information.
15. REPORT – SENATE GRADUATE AND RESEARCH COUNCIL
   Received for information.

16. REPORT – SENATE UNDERGRADUATE COUNCIL
   Received for information.

17. REPORT – SENATE LONG RANGE PLANNING COMMITTEE
   Received for information.

18. REPORT OF THE VICE-PRESIDENT, RESEARCH & INTERNATIONAL. Received
    for information.

19. REPORT OF THE VICE-PRESIDENT, ACADEMIC AND PROVOST
    a. Faculty Appointments, Leaves. Received for information.

20. OTHER BUSINESS
    There was no other business.

    With no further business in open session, Senate convened in confidential session.

Date of Meeting: June 10, 2024

Agenda Item Identification: 8) Waterloo Accessible Education Project

Recommendation/Motion:
For information

Summary:
The Accessible Education Project is a substantial initiative to improve teaching and learning at Waterloo, based on the recognition that good teaching is accessible teaching. The goal of the project is to consult with the campus community and arrive at ways to remove obstacles that prevent students and potential students with the ability and desire to benefit from a Waterloo education from doing so.

Jurisdictional Information:
This project is part of the larger Disability Inclusion Steering Committee (DISCo) project. It embodies the University’s response to the Accessibility for Ontarians with Disabilities Act Education Standard recommendations and its commitment to accessibility to education of the highest quality.

Governance Path:
The DISCo project, of which Accessible Education is a central part, has been discussed at Deans Council+ (April 5, 2023), Leadership Forum (May 11, 2025), Council of Academic Leaders (May 25, 2023). Progress on the Accessible Education Project is discussed monthly at the Undergraduate Student Relations Committee.

Previous Action Taken:
N/A
Office of the Associate Vice-President, Academic

Highlights:

After years of consultations, including with students who encountered unnecessary barriers in their efforts to obtain a university education in Ontario, the Provincial Government released a draft “Educational Standard” as a next step towards the goal of the Accessibility for Ontarians with Disabilities Act of achieving an accessible Ontario. It included a list of 185 ways to remove barriers and create equitable access to higher education for persons with disabilities. The recommendations cover many aspects of a university’s operations, including the built environment, accommodation policies, and much else.

In response, the University of Waterloo established the Disability Inclusion Steering Committee (DISCo) to support coordination, collaboration and strategic direction to help us improve accessibility in an effective and efficient way that simultaneously advances other university priorities. A first step was to assign leadership and responsibility for responding to the various recommendations to the appropriate people on campus, tasking them with and supporting them as do so.

A crucial step in this approach was to bundle approximately 20 of the recommendations where the response is likely to most directly affect teaching and learning and launch the Accessible Education Project. This Project makes use of the capacity of the recently established Teaching Innovation Incubator to support the conceptualization, management, and coordination of the project. That it must be complex is obvious from the fact that the recommendations potentially have implications for every academic program and every course at the University, as well as the units that provide support for teaching and learning.

The core principle that motivates the project is that good teaching is accessible teaching, so the project is focused on improving the quality of teaching and learning at Waterloo by making it accessible. The focus is not on “compliance,” because if we improve teaching and learning in the ways proposed, compliance with recommendations will be a by-product of our efforts.

The project is obviously a major “change management” exercise. Unlike traditional change management, though, the Project Team does not have a detailed understanding of how things will work best in all the various facets of the University. This project won’t work as an exercise if it is (or is perceived to be) an exercise in telling people how to teach their courses from now on. Instead, the project will rely on consultation and will generally take the approach of providing support so that the appropriate solutions are a co-created in ways that are appropriate to the specific context (e.g., they might differ due to specific learning objectives or pedagogical approaches, while still achieving accessibility).

After working for almost a year with a somewhat low profile, the Accessible Education Project is ready to move to a more public phase. This presentation at Senate will describe: the three main sub-teams in project: the “by faculty for faculty” and “build on what is working well in some places already” approaches to much of the curriculum, learning materials, and pedagogical work; and opportunities for students, faculty members, and staff to become involved in the project.

Next Steps:

Senators will be invited to become involved in the project, for instance as “product testers”.

Accessible Education - Frequently Asked Questions (link)
SUMMARY:

Annual UARC Report

Members of the University Appointments Review Committee (UARC), appointed by the Vice-President, Academic & Provost in consultation with Deans' Council and the President of the Faculty Association, advise on regular faculty appointments with a duration of more than two years. UARC members review hiring processes and provide advice to the Dean before a hiring recommendation is sent to the Vice-President, Academic & Provost for approval. Generally, UARC monitors the hiring process to ensure that positions were properly advertised, that both the letter and the spirit of the hiring procedure were followed and that there was a thorough search for candidates with attention to equity. In accordance with Policy 76 – Faculty Appointments, the committee reports to Senate annually, via the Vice-President, Academic & Provost, on its activities and operations. As of July 1, 2024 UARC is overseen by the Associate Vice-President, Faculty Planning and Policy.

From 1 September 2022 to 31 August 2023, UARC reviewed a total of 91 proposals for regular faculty appointments. For comparison purposes, the total number of proposals reviewed in years past was as follows:

<table>
<thead>
<tr>
<th>YEAR</th>

</tbody>
</table>

Length of the Review Process
Appointment proposals from academic units and faculties were generally timely, and department chairs/schools directors have been very helpful in providing any additional information requested. Advance notice of proposals continues to be important to ensure speedy turnaround. Policy 76 specifies five working days for the review process. During the past year, UARC members were able to complete most reviews within five working days unless there was some missing information and discussions with the chair/director or dean were required.

Administration
Administrative information concerning UARC can be found at: https://uwaterloo.ca/faculty-planning-policy/recruitment/university-appointments-review-committee

UARC Membership
Chair: Gerry Schneider (until May 2025)
Secretary: Nadia Singh, Director, Policy Planning and Decision Support

Faculty of Arts:
Anna Esselment (until May 2024)
Julia Roberts (until May 2025)

Faculty of Engineering:
Marianna Polak (until May 2026)
Catherine Rosenberg (until May 2024)
Office of the Vice-President, Academic & Provost

Faculty of Environment:
Prateep Nayak (until May 2024)
Johanna Wandel (until May 2024)

Faculty of Health:
Lora Giangregorio (until May 2025)
Scott Leatherdale (until May 2025)

Faculty of Mathematics:
Kevin Hare (until May 2027)
Pengfei Li (until May 2026)

Faculty of Science:
Brian Dixon (until May 2025)
Shaun Frape (until May 2025)

Senate
The following is a summary of meetings since my last report in May 2023.

Summary of Meetings

1. Academic Colleagues Meeting, August 15-16, 2023

Discussion Theme: Wellbeing of International Students: Solutions from Design Thinking

Dr. Liliane Dionne, Faculty of Education, University of Ottawa, presented research on the Wellbeing of International Students. Using a design-thinking approach, which included peer interviews between graduating BEd students (solution-makers) and international students at the University of Ottawa, Dr. Dionne and her colleagues developed creative solutions to improve the wellbeing of international students on the University campus, including a number of attempts to connect students with their natural environments. This led to initiatives to enhance campus art and to create more opportunities to socialize and study outdoors. During the discussion, Colleagues reflected on how they might contribute to improving the wellbeing of international students and on the recommendations of COU’s International Education Working Group, which we had received an update on at the February 2023 meeting.

Updates and Reports—Highlights

COU President Steve Orsini delivered an update on COU’s activities in support of the Ontario government’s Blue-Ribbon Panel and shared a preview of his presentation on housing for the upcoming Association of Municipalities Ontario (AMO) Conference. In the discussion that followed, it was highlighted that COU’s position on enrollment corridors is that any changes to them should be.

2. 316th Meeting of Council, October 16, 2023

I want to highlight two items in the agenda: 1) The Colleagues led a discussion on the topic of Mitigating Anti-LGBTQ2S+ Movements and Promoting Safe Spaces on Campus. A few Colleagues highlighted practices at their universities and proposed additional actions that would help ensure the campuses are places where members of the university community can express themselves freely without fear of reprisal or physical harm. A few members of Council expressed interest in future discussions related to the role of the university ensuring freedom of expression on their campus. 2) Steven Orsini provided a brief update on COU’s increasing activities related to the release of Blue Ribbon Panel report and recommendations.
3. Academic Colleagues Meeting, December 12-13, 2023

Discussion Theme: Free Expression in Relation to Geopolitical Events

Dr. James L. Turk, Director of the Centre for Free Expression, Toronto Metropolitan University, met with COU Academic Colleagues to discuss freedom of expression and academic freedom on university campus. One focus was on the University of Chicago Kalven Committee’s “Report on the University’s Role in Political and Social Action (1967).” Turk notes that the Kalven Report’s language of “institutional neutrality” is often mischaracterized as universities should play no role in political and social debates. This mischaracterization, Turk argues, misses the point made in the Kalven Report: “A university has a great and unique role to play in fostering the development of social and political values in a society.” The distinction the Kalven Report makes is that the university, as an institution, must remain neutral out of respect for free inquiry on the part of faculty and students. As a result, universities play a central role in political and social change not by senior leaders taking formal positions on political and social matters on behalf of their institutions but, rather, by ensuring that universities remain a forum for faculty and students to freely question, challenge, inquire, and take positions on political and social matters. Drawing on a Stanford University update on freedom of expression, from October 2023, Academic Colleagues discussed instances in which universities, fulfilling their operational responsibilities, sometimes take positions that have political and social ramifications such as decisions regarding investments. When such concerns arise, universities must continue to ensure that faculty and students remain free to exercise their freedom of expression and that faculty remain free to exercise their academic freedom. In all cases, universities must comply with existing laws and government standards (e.g., Criminal Code, labour standards).

Updates and Reports—Highlights

Steve Orsini, the COU President, reported that COU is asking for a timely response from government on the implementation of the Blue-Ribbon Panel report, specifically the recommendations on increasing tuition and operating funding. The President also noted COU recently published an efficiencies report that provides a comprehensive response to the government’s request that universities are committed to greater efficiencies. At the same time, it was noted that the government has a role to play in ensuring the financial sustainability of institutions in terms of increasing tuition and operating grants and in reducing costs to the system (e.g., excessive reporting, red tape and unfunded mandates). As a further response, COU is continuing with its escalating advocacy campaign and is working with provincial associations (such as the Ontario University Student Alliance, and the Ontario Chamber of Commerce and Colleges Ontario) on joint advocacy.

4. Academic Colleagues Meeting, February 13-14, 2024

Discussion Theme: Ontario Student Leadership and Advocacy

Vivan Chiem, President, and Malika Dhanani, Executive Director from the Ontario University Student Alliance (OUSA) joined Academic Colleagues for a discussion of pressing matters facing university students. Among the matters highlighted in their presentation were mental health, accessibility, housing, and food insecurity. It was noted that OUSA is also focused on the matter of sector sustainability (e.g., constrained university revenues through tuition and grant freezes) and awaiting the Blue-Ribbon Panel Report. Academic Colleagues took a particularly keen interest in issue of food insecurity, with a number noting that this is a “town and gown” issue that requires shared vision and integrated response.

Updates and Reports—Highlights

Steve Orsini, President of COU, briefed Colleagues on COU increasing efforts to receive a government response on the Blue-Ribbon Panel Report. With a promised end-of-February announcement, COU is continuing to advocate for a response that fully embraces the financial recommendations in the Blue-Ribbon Panel Report. Orsini reported that at least 10 Ontario universities are facing deficit budgets, with a number of them facing serious financial situations without substantial increases in revenue from...
government grant, tuition, or both. Orsini acknowledge that any additional revenue would likely not come from tuition but, rather, government grant.

5. Academic Colleagues Meeting, April 3-4, 2024

Discussion Theme: University Governance

Cheryl Foy, the former University Secretary and In-House Counsel at Ontario Tech University, current President of Strategic Governance Consulting Services Ltd., and the author of An Introduction to University Governance, provided Colleagues with an overview of approaches to university governance and contemporary challenges facing governance. She focused on five themes: 1) the relationship between university governance and institutional autonomy; 2) shared governance as a system and its models; 3) the roles of boards and academic governing bodies; 4) the importance of paying attention to academic governing bodies (senates); and 5) the role of faculty association in governance. The discussion concentrated on the necessity of universities undertaking educational opportunities for their board and senate members to understand the unique roles each plays in collegial governance. Foy made the point that a lack of understanding of members’ various roles often provides the basis for a breakdown in communication and trust among boards, senior leadership, and academic governing bodies.

Updates and Reports—Highlights

Steve Orsini, President of COU, briefed Colleagues on COU’s response to the Blue-Ribbon Panel Report. On behalf of COU, Orsini expressed concern that the funding recommendations in the Blue-Ribbon Panel Report were not adopted by the Ontario government. Echoing the COU statement “Ontario’s Response Falls Far Short of Blue Ribbon Panel Recommendations” (Feb. 26, 2024), Orsini stated that, while the additional funding provided by Government is welcomed, it does not adequately address the revenue shortfalls created by the multi-year tuition and grant freezes, which will result in further budgetary pressures on a majority of Ontario universities into the future. With the passage of Bill 166, which places a cap on international student study permits, budget pressures will likely become more acute.

6. 317th Meeting of Council, April 4, 2024

The primary focus of the COU Council meeting was the transition of COU to conform with the Ontario Not-For-Profit Corporations Act (ONCA). While the membership on COU Council did not change, the governing structure and members’ responsibilities changed to conform with ONCA. Please contact Scott Kline if you would like further information on the changes.

Updates and Reports—Highlights

The Council agenda typically includes a presentation from the Colleagues. This meeting, however, the Colleagues decided to forgo a presentation due to the agenda being full of governance matters related to the COU transition. The Colleagues provided a brief report on their meetings.

Steve Orsini, President of COU, briefed Council on the Blue-Ribbon Panel Report. He reiterated that the funding provided by Government is welcomed, but it does not adequately address the revenue shortfalls created by the multi-year tuition and grant freezes, which will result in further budgetary pressures on most Ontario universities into the future. These shortfalls will likely be exacerbated by the passage of federal legislation, with Bill 166, to limit the number of international students permitted to study in Canada.
To: Senate

Sponsor: Charmaine Dean
Vice-President, Research & International

Jeff Casello
Associate Vice-President, Graduate Studies and Postdoctoral Affairs

Presenter: Jeff Casello
Contact Information: jcasello@uwaterloo.ca

Date of Meeting: June 10, 2024

Agenda Item Identification: 11(a) Report – Senate Graduate & Research Council:
Major Modification – MSc in Physics, MSc in Physics – Quantum Information, & MSc in Physics – Nanotechnology

Recommendation/Motion:
To approve the proposed major modifications to the Master of Science (MSc) Physics, MSc in Physics – Quantum Information, and MSc in Physics – Nanotechnology, effective September 1, 2024, as presented.

Summary:
Senate Graduate & Research Council met on May 6, 2024 and agreed to forward the following items to Senate for approval as part of the regular agenda.

Jurisdictional Information:
This item is being submitted to Senate in accordance with Senate Bylaw 2, section 4.03(e): “Consider, study and review all proposals for new graduate programs, the deletion of graduate programs, major changes to existing graduate programs, arrange for internal appraisals as the council shall see fit, and make recommendations to Senate thereon.”
Governance Path:
Science Faculty Council approval date (mm/dd/yy): 03/19/24
Senate Graduate & Research Council approval date (mm/dd/yy): 05/06/24

Highlights/Rationale:
The proposed revisions are to add new transfer entry Internship options to the following MSc programs, MSc in Physics, MSc in Physics – Quantum Information program and MSc in Physics – Nanotechnology program.

Work integrated learning (WIL) options do not currently exist in the Department of Physics and Astronomy graduate programs. In line with the University's strategic plan, the Department would like to offer an internship option for the MSc in Physics Thesis, Master's Research Paper and Coursework study options. The Department of Physics and Astronomy has received feedback from current faculty and current graduate students that opportunities for work experiences outside of coursework or traditional thesis-based research is desirable to enrich students' degrees as well as provide them with many transferrable skills and a variety of experiences in preparation to enter the workplace after graduation. The internship will provide students with the opportunity to apply coursework and research experiences to real-world problems and allow collaboration with industry or other partners. The addition of the internship option continues to align with the programs learning outcomes.

Documentation Provided:
Appendix A – Graduate Studies Program Revision Template – MSc Physics
Appendix B – Graduate Studies Program Revision Template – MSc Physics – Quantum Information
Appendix C – Graduate Studies Program Revision Template – MSc Physics – Nanotechnology
Prior to form submission, review the content revision instructions and information regarding major/minor modifications. For questions about the form submission, contact Trevor Clews, Graduate Studies and Postdoctoral Affairs (GSPA).

Faculty: Science

Program: Master of Science (MSc) in Physics

Program contact name(s): Jan Kycia, Associate Chair

Form completed by: Holly Haig-Brown, Kayla Sutton, Graduate Program Manager(s)

Description of proposed changes:
Note: changes to courses and milestones also require the completion/submission of the SGRC Graduate Studies Course/Milestone Form.

Adding a new transfer entry Internship option to the MSc in Physics program, in addition to keeping the regular existing MSc program.

Is this a major modification to the program? Yes

Rationale for change(s):

Work integrated learning (WIL) options do not currently exist in the Department of Physics and Astronomy graduate programs. In line with the University’s strategic plan, we would like to offer an internship option for the MSc in Physics Thesis, Master’s Research Paper and Coursework study options. The Department of Physics and Astronomy has received feedback from current faculty and current graduate students that opportunities for work experiences outside of coursework or traditional thesis-based research is desirable to enrich students’ degrees as well as provide them with many transferrable skills and a variety of experiences in preparation to enter the workplace after graduation. The internship will provide students with the opportunity to apply coursework and research experiences to real-world problems and allow collaboration with industry or other partners. The addition of the internship option continues to align with the programs learning outcomes.

Studies in the Department of Physics and Astronomy.

Degree requirements

**Thesis option:**

- Graduate Academic Integrity Module (Graduate AIM)

- Courses
  - Students must complete the following 4 one-term courses (0.50 unit weight):
    - 1 Physics core course
    - 2 graduate level courses
    - 1 graduate level or 300 or 400 level undergraduate course. Undergraduate courses must be approved by the student’s supervisor, the Associate Chair of Graduate Studies, Department of Physics and Astronomy and the Associate Dean of Science for Graduate Studies prior to enrolment in the course.
    - Physics core courses:
      - PHYS 701 Quantum Mechanics 1
      - PHYS 703 Introduction to Quantum Field Theory
      - PHYS 704 Statistical Physics 1
      - PHYS 706 Electromagnetic Theory
      - PHYS 767 Quantum Information Processing
      - PHYS 781 Fundamentals of Astrophysics
      - PHYS 782 Fundamentals of Astrophysics II: Observational Techniques and Data Analysis
  - An average of at least 70% must be obtained in the required courses. A minimum grade of 65% is required for a pass in each course. If a student does not meet these minimum grade requirements, or receives a failing grade in any course, the student may be required to withdraw from the
Current MSc in Physics Graduate Studies Academic Calendar content:

- **Master's Thesis**
  - Students must complete a thesis based on original research. The subject of research must be approved by the candidate's supervisor.
  - Acceptance of the thesis requires the approval by an Examining Committee following an oral defence of the thesis.

- **Other requirements**
  - Advisory Committee meetings: it is required that the student meet formally with their Advisory Committee within the first six months of registration and subsequently at least once per year. If the student receives more than one unsatisfactory evaluation from an Advisory Committee meeting, they may be required to withdraw from the program.
  - The MSc Advisory Committee must consist of at least three members, including:
    - The student’s supervisor(s); the primary supervisor acts as the Committee Chair.
    - At least one Committee member that is a regular faculty member of the Department of Physics and Astronomy at the University of Waterloo. Note: This requirement does not apply for MSc students who are supervised by a Perimeter Institute faculty member with ADDS status.
    - At least two Committee members that are regular, adjunct, or cross-listed faculty members of the Department of Physics and Astronomy at the University of Waterloo or the Department of Physics at the University of Guelph.

Proposed MSc in Physics – Internship Graduate Studies Academic Calendar content:

- **Master’s Internship**
  - A Master’s internship is available for students to collaborate with a partner in industry or elsewhere.
  - The internship must be complementary to the student’s thesis project.
  - Requests to undertake an internship must be approved by the student’s supervisor and the Associate Chair, Graduate Studies.
  - It is the student’s responsibility to identify potential organizations with which to undertake their internship. Students will prepare an internship proposal, outlining how the work of the organization relates to their thesis and the experience sought through the internship. A letter of support from the organization indicating the role and location of the internship and willingness of the direct supervisor to mentor the intern will be submitted to the Associate Chair, Graduate Studies.
  - The internship milestone requires the successful completion of a one-term (four-month) full-time work experience with a department approved partner. Internships will normally take place in the 3rd, 4th or 5th term of study. The internship may last for up to two terms (8 months) with approval of the student’s supervisor and Associate Chair, Graduate Studies, provided that the internship does not result in the candidate being enrolled past-program time limits.
  - Students cannot complete their program with the final term as an internship term.
  - A written report arising out of the internship experience will be required and will be evaluated by the student’s supervisor and another reader designated by the Graduate Officer. This report should be used toward the Master’s thesis. The report should summarize the work experience and linkages to the student’s thesis research, program curriculum, and professional development goals.

- **Master’s Thesis**
Current MSc in Physics Graduate Studies Academic Calendar content:

- The MSc Defence Committee must consist of a minimum of three voting faculty members, including:
  - The supervisor(s).
  - Two other faculty members, of which one must be a regular faculty member of the Department of Physics and Astronomy at the University of Waterloo.

work to be completed in the period between this and the subsequent submission. The activity report is reviewed and evaluated by the student’s supervisor and the Graduate Officer.

Coursework option:

- **Graduate Academic Integrity Module (Graduate AIM)**

- **Courses**
  - At this time, the only MSc in Physics coursework option includes a Graduate Specialization in Quantum Technology.
  - A Graduate Specialization is a University credential that is recognized on the student’s transcript but not on the diploma and is intended to reflect that a student has successfully completed a set of courses that together provide an in-depth study in the area of the Graduate Specialization. Students must complete the following 8 one-term courses (0.50 unit weight) acceptable for graduate credit in order to obtain the Graduate Specialization in Quantum Technology on their transcript:
    - PHYS 701 Quantum Mechanics
    - PHYS 760/QIC 860 Laboratory on Control of Quantum Technology
    - PHYS 761/QIC 861 Laboratory on Photonic Quantum Technology
    - PHYS 762/QIC 862 Laboratory on Low Temperature Quantum Technology and Nanofabrication
    - PHYS 763/QIC 863 Independent Project in Quantum Technology or 1 QIC 800 level elective
    - PHYS 767/QIC 710 Quantum Information Processing
    - QIC 750 Quantum Information Processing Devices
    - 1 PHYS 700 level or QIC 800 level elective

Faculty: Science

Program: Master of Science (MSc) in Physics – Quantum Information

Program contact name(s): Jan Kycia, Associate Chair

Form completed by: Kayla Sutton, Graduate Program Manager

Description of proposed changes:
Note: changes to courses and milestones also require the completion/submission of the SGRC Graduate Studies Course/Milestone Form.

Adding a new transfer entry Internship option to the MSc in Physics – Quantum Information program, in addition to keeping the regular existing MSc in Physics – Quantum Information program.

Is this a major modification to the program? Yes

Rationale for change(s):

Work integrated learning (WIL) options do not currently exist in the Department of Physics and Astronomy graduate programs. In line with the University’s strategic plan, we would like to offer an internship option for the MSc in Physics – Quantum Information program. The Department of Physics and Astronomy has received feedback from current faculty and current graduate students that opportunities for work experiences outside of coursework or traditional thesis-based research is desirable to enrich students’ degrees as well as provide them with many transferrable skills and a variety of experiences in preparation to enter the workplace after graduation.

The internship will provide students with the opportunity to apply coursework and research experiences to real-world problems and allow collaboration with industry or other partners. The addition of the internship option continues to align with the programs learning outcomes.

- Internship may last for up to two terms (8 months) with approval of the student’s supervisor and Associate Chair, Graduate Studies, provided that the internship does not result in the candidate being enrolled past-program time limits.
  - Students cannot complete their program with the final term as an internship term.
  - A written report arising out of the internship experience will be required and will be evaluated by the student’s supervisor and another reader designated by the Graduate Officer. This report should be used toward the Master’s thesis. The report should summarize the work experience and linkages to the student's thesis research, program curriculum, and professional development goals.

- Master’s Thesis
  - Students must complete a thesis based on some original research in quantum information. The subject of research must be approved by the candidate’s supervisor.
  - Acceptance of the thesis requires the approval by an Examining Committee following an oral defence of the thesis.

- Other requirements
  - Advisory Committee meetings: it is required that the student meet formally with their Advisory Committee within the first six months of registration and subsequently at least once per year. If the student receives more than one unsatisfactory evaluation from an Advisory Committee meeting, they may be required to withdraw from the program.
  - The MSc Advisory Committee must consist of at least three members, including:
    - The student’s supervisor(s); the primary supervisor acts as the Committee Chair.
    - At least one Committee member that is a regular faculty member of the Department of Physics and Astronomy at the University of Waterloo. Note: This
## Current MSc in Physics – Quantum Information Graduate Studies Academic Calendar content:

## Proposed MSc in Physics – Quantum Information – Internship Graduate Studies Academic Calendar content:

- Requirement does not apply for MSc students who are supervised by a Perimeter Institute faculty member with ADDS status.
  - At least two Committee members that are regular, adjunct, or cross-listed faculty members of the Department of Physics and Astronomy at the University of Waterloo or the Department of Physics at the University of Guelph.
  - The MSc Defence Committee must consist of a minimum of three voting faculty members, including:
    - The supervisor(s).
    - Two other faculty members, of which one must be a regular faculty member of the Department of Physics and Astronomy at the University of Waterloo.

### How will students currently registered in the program be impacted by these changes?

*Students currently enrolled in a program with an optional internship milestone will have the option to partake in an internship under the same guidelines as indicated in the Graduate Studies Academic Calendar.*

**Department/School approval date** (mm/dd/yy): 12/13/23  
**Reviewed by GSPA** (for GSPA use only) ☒ date (mm/dd/yy): 11/14/23  
**Faculty approval date** (mm/dd/yy): 03/19/2024  
**Senate Graduate & Research Council (SGRC) approval date** (mm/dd/yy):  
**Senate approval date** (mm/dd/yy) (if applicable):
Prior to form submission, review the content revision instructions and information regarding major/minor modifications. For questions about the form submission, contact Trevor Clews, Graduate Studies and Postdoctoral Affairs (GSPA).

Faculty: Science

Program: Master of Science (MSc) in Physics - Nanotechnology

Program contact name(s): Jan Kycia, Associate Chair

Form completed by: Kayla Sutton, Graduate Program Manager

Description of proposed changes:
Note: changes to courses and milestones also require the completion/submission of the SGRC Graduate Studies Course/Milestone Form.

Adding a new transfer entry Internship option to the MSc in Physics - Nanotechnology program, in addition to keeping the regular existing MSc in Physics - Nanotechnology program.

Is this a major modification to the program? Yes

Rationale for change(s):

Work integrated learning (WIL) options do not currently exist in the Department of Physics and Astronomy graduate programs. In line with the University’s strategic plan, we would like to offer an internship option for the MSc in Physics - Nanotechnology program. The Department of Physics and Astronomy has received feedback from current faculty and current graduate students that opportunities for work experiences outside of coursework or traditional thesis-based research is desirable to enrich students’ degrees as well as provide them with many transferrable skills and a variety of experiences in preparation to enter the workplace after graduation. The internship will provide students with the opportunity to apply coursework and research experiences to real-world problems and allow collaboration with industry or other partners. The addition of the internship option continues to align with the programs learning outcomes.

Proposed effective date: Term: Fall Year: 2024

**Admission requirements**

- **Minimum requirements**  
  o An Honours Bachelor's degree (or equivalent) in Science with at least a 75% standing.

- **Application materials**  
  o Graduate Record Examination (GRE) Physics subject test scores for all students who have completed their post-secondary education outside of Canada.  
  o Supplementary information form  
  o Transcript(s)

- **References**  
  o Number of references: 3  
  o Type of references: 2 of which are normally from academic sources

- **English language proficiency (ELP) (if applicable)**

**Degree requirements**

**Thesis option:**

- Graduate Academic Integrity Module (Graduate AIM)

- Courses  
  o Students must complete the following 4 one-term courses (0.50 unit weight):  
    - NANO 600 Introduction to Nanotechnology  
    - 1 nanotechnology core course  
    - 1 of PHYS 701, PHYS 704 or PHYS 706
Current MSc in Physics – Nanotechnology Graduate Studies Academic Calendar content:

- Students must complete the following 4 one-term courses (0.50 unit weight):
  - NANO 600 Introduction to Nanotechnology
  - 1 nanotechnology core course
  - 1 of PHYS 701, PHYS 704 or PHYS 706
  - 1 graduate level or 300 or 400 level undergraduate course. Undergraduate courses must be approved by the student’s supervisor, the Associate Chair of Graduate Studies, Department of Physics and Astronomy and the Associate Dean of Science for Graduate Studies prior to enrolment in the course

- Nanotechnology core courses:
  - NANO 601 Characterization of Nanomaterials
  - NANO 602 Structure and Spectroscopy of Nanoscale Materials
  - NANO 603 Nanocomposites
  - NANO 604 Nanomechanics and Molecular Dynamics Simulations
  - NANO 605/SYDE 683 Design of MEMS & NEMS
  - NANO 606/SYDE 682 Advanced MicroElectroMechanical Systems: Physics, Design & Fabrication

- Core courses are designed to provide the base knowledge and skill set required to prepare students for more specialized courses and to conduct interdisciplinary nanoscale research.

- Students who have completed their Bachelor of Applied Science (BASc) degree in Nanotechnology Engineering at the University of Waterloo can not take NANO 600. Instead, they can choose any 1 course from the list of nanotechnology core courses.

- An average of at least 70% must be obtained in the required courses. A minimum grade of 65% is required for a pass in each course. If a student does not meet these minimum grade requirements, or receives a failing grade in any course, the student may...

Date of Meeting: June 10, 2024

Agenda Item Identification: 11(b) Report - Senate Graduate & Research Council: Regulation Revisions - Approved Doctoral Dissertation Supervisors (ADDS)

Recommendation/Motion:
To approve the proposed academic regulation revisions to the Approved Doctoral Dissertation Supervisors (ADDS) section of the Graduate Studies Academic Calendar (GSAC) and the addition of the new Graduate students’ supervisors and committees section of the GSAC, effective September 1, 2024, as presented.

Summary:
The following item had been withdrawn from the April 8, 2024 Senate following concerns raised regarding the text and the consultation process that preceded the Senate meeting. Subsequently, conversations were had with FAUW leadership, including both the FAUW President and the Chair of FAUW’s lecturer committee. As a result of those discussion, revisions were made. These changes have been vetted by FAUW’s Lecturers’ Committee on April 23, 2024 and were endorsed unanimously at the Faculty Relations Committee on May 2, 2024. Senate Graduate & Research Council then met on May 6, 2024 and agreed to forward the following item to Senate for approval as part of the regular agenda.
Jurisdictional Information:

This item is being submitted to Senate in accordance with Senate Bylaw 2, section 4.03(a): “Make recommendations to Senate with respect to the governance, direction and management of, or any changes in rules, regulations or policies for graduate studies and research in the university.”

Governance Path:

Senate Graduate & Research Council approval date (mm/dd/yy): 02/04/24
Senate approval date (mm/dd/yy): 04/08/2024 (withdrawn)
Senate Graduate & Research Council approval date (mm/dd/yy): 05/06/2024 (revised)

Highlights/Rationale:

Graduate Studies and Postdoctoral Affairs (GSPA) continues the review of GSAC to ensure that the information presented is complete, clear and consistent with current practice.

The proposed revisions include:

- renaming ADDS status – Approved Doctoral Dissertation Supervisory status – to Sole-Supervisory Privilege Status (SSPS);
- introducing a new stand-alone section to the Graduate Studies Academic Calendar which will replace program page references to ADDS status;
- eliminating the listing of faculty with ADDS, currently linked to at the end of every PhD program page.

The included appendix contains information to Senate web content which provides further context around SSPS.

SSPS is to be divided into two categories: SSPS1 and SSPS2. Faculty members who hold SSPS1 may sole-supervise Master’s students. Faculty members who have SSPS2 may sole-supervise Master’s students and PhD students. Previously, the university had no oversight on the sole-supervision of Master’s students which motivates the creation of the disaggregate permission structure.

The changes to the designation will have no impact on those who currently hold ADDS status. Their permissions will remain the same.

For new faculty hires, the following holds:

- New tenure stream faculty will normally be granted SSPS1 at the time of appointment. Such status should be included in the letter of appointment.
- The processes by which tenure stream faculty can obtain SSPS2 remains the same.
- New teaching stream faculty may co-supervise PhD students with a tenure stream faculty who holds SSPS2 status, and with the arrangement approved by the Associate Dean Graduate Studies in the Faculty.
• New teaching stream faculty may co-supervise Master's students with a tenure stream faculty who holds SSPS (1 or 2) status, and with the arrangement approved by the Graduate Officer in the Department / School.

• In exceptional cases, other supervisory structures may be granted for PhD and Master's students by the AVP GSPA on the recommendation of the Associate Dean Graduate Studies in the student's home faculty.

Item 12a in the Senate Consent Agenda, “Report – Senate Graduate & Research Council: Regulation Revisions – Graduate Studies Academic Calendar”, includes proposed new section of the GSAC for approval, titled “Graduate students’ supervision and committees” to be found under the heading: Graduate academic roles and program requirements | Graduate students’ supervisors and committees.

Column 3 in the table of this new section, indicates that a tenure stream faculty member who has not been granted SSP status (at level 1 or 2) may co-supervise, at the discretion of the Associate Dean for PhDs and the Associate Chair for Master's. This condition is necessary because if a faculty colleague has their SSPS2 revoked, and are therefore without SSPS, they may be permitted to work towards regaining SSPS2 status by co-supervising.

The decision makers, the ADG or Graduate Officer, would evaluate the circumstances surrounding the revocation of SSPS and the potential benefits to the student / co-supervisor in making the decision about whether this is permitted.

**Revisions to the proposal:**

The following revisions have been made since previously being presented to Senate:

1. Editorial changes have been made to replace “Lecturers” with “Teaching Stream faculty” and “Tenure Track” faculty with “Tenure Stream” faculty for consistency with other University guidelines or Policies.

2. Notes have been added to the summary table on Page 11 of this submission in order to:
   a. Make clear that existing, non-conforming privileges for sole supervision will remain permitted, as appropriate;
   b. Make explicit that pathways exist for new and existing Teaching Stream Faculty who have an active research program and a familiarity with supervisory best practices to sole-supervise Master's students.

3. The process for Teaching Stream faculty to seek SSPS1 is made explicit.

4. There is an obligation on behalf of the University to provide faculty members whose SSPS has been revoked with guidance on how to rectify gaps in their supervisory practices in order to reacquire SSPS privilege.

5. The roles of Advisory Committees have been updated to include:
   a. A requirement that they meet and report on a student's progress annually;
   b. An acknowledgement that these committees can be places where concerns about supervisory performance are identified and communicated to Graduate Officers or Associate Deans.
6. Allows for faculty members who do not hold SSPS2, but are in graduate leadership positions (e.g., as a program director for a course-based master's program) to be part of a Faculty Graduate Studies Committee.

**Documentation Provided:**

Appendix A – Approved Doctoral Dissertation Supervisor (ADDS) renamed Sole-supervisory privilege status (SSPS) and Graduate students’ supervisors and committees
Approved Doctoral Dissertation Supervisor (ADDS) renamed Sole-supervisory privilege status (SSPS)

The following is a new stand-alone section to be added to the Graduate Studies Academic Calendar which will replace program page references to ADDS status, and listing of faculty with ADDS, currently linked to at the end of every PhD program page.

The following ADDS status content appears on the GSPA site and is being shared with SGRC for information, as it relates to the calendar content above: https://uwaterloo.ca/graduate-studies-postdoctoral-affairs/about/organization-graduate-studies#ADDS
Approved Doctoral Dissertation Supervisor (ADDS)

Preamble

The Approved Doctoral Dissertation Supervisor (ADDS) status is governed by a series of regulations governing how faculty members gain the privilege of sole-supervising PhD students. As such, they are regulations whose authority is vested in the Senate, and any changes to them are to be discussed at Faculty Relations Committee, Graduate Student Relations Committee and the Faculties, and then approved by Senate Graduate and Research Council and by Senate.

Introduction

These regulations set out the qualifications necessary for faculty members to supervise PhD students. Faculty members who demonstrate the qualifications set out in these regulations will receive Approved Doctoral Dissertation Supervisor (ADDS) status, and only they will be:

- permitted to independently supervise PhD students;
- eligible for membership on the Graduate Studies Committee of a Faculty;
- eligible for membership on the University of Waterloo Senate Graduate and Research Council;
- eligible to be Graduate Officers, Faculty Associate Deans, Graduate Studies, or Associate Vice-President, Graduate Studies and Postdoctoral Affairs.
- eligible to chair PhD Examining Committees.

Sole Supervisory Privilege Status (SSPS)

Preamble

The Sole Supervisory Privilege Status (SSPS1 or SSPS2) is a regulation for which authority is vested in the Senate, and any changes to this governance are to be discussed at Faculty Relations Committee, Graduate Student Relations Committee and the Faculties, and then approved by Senate Graduate and Research Council and by Senate.

Introduction

These regulations set out the qualifications necessary for faculty members to sole supervise PhD and Master's students. Faculty members who demonstrate the qualifications set out in these regulations will receive Sole Supervisory Privilege Status (SSPS1 or SSPS2). A Faculty member who holds SSPS2 status will be:

- permitted to independently supervise PhD students;
- permitted to independently supervise Master’s students;
- eligible for membership on the Graduate Studies Committee of a Faculty;
- eligible for membership on the University of Waterloo Senate Graduate and Research Council;
- eligible to be Graduate Officers, Faculty Associate Deans, Graduate Studies, or Associate Vice-President, Graduate Studies and Postdoctoral Affairs.
- eligible to chair PhD Examining Committees.

Normally, a tenure stream faculty member will be granted the privilege to sole supervise
Qualification for ADDS Status

Faculty members who qualify for ADDS status must:

- Be a faculty member at the professorial rank at the University of Waterloo (this includes clinical faculty);
- Normally hold a PhD degree or a terminal degree in their field;
- Demonstrate continuing competence and achievement in research or scholarship appropriate for the discipline;
- Demonstrate appropriate familiarity with University of Waterloo policies and procedures on PhD supervision. This is preferably achieved by the faculty member attending a University-provided workshop or receiving training on supervisory procedures at the Faculty level;
- Demonstrate appropriate supervisory experience: this can be achieved by the faculty member choosing one of the following:
  - Successfully completing a workshop series organized by the office of the Associate Vice-President, Graduate Studies and Postdoctoral Affairs, and facilitated by CTE on graduate supervision, over the course of one year;
  - Successfully supervising to completion at least one Master’s thesis;
  - Having co-supervised or supervised a PhD thesis to completion (see Guidelines for Best Practice in Co-Supervision).

The above criteria are meant to ensure that faculty members have acquired the appropriate knowledge to facilitate becoming Master’s students, or SSPS1, at the time of the faculty member’s appointment. Tenure stream faculty members who do not hold SSPS1 may, at the discretion of the Associate Dean Graduate Studies, sole-supervise Master’s students.

Qualification for SSPS2

Faculty members who qualify for SSPS2 must:

1. Be a tenure stream faculty member at the University of Waterloo (this includes clinical faculty);
2. Normally hold a PhD degree or a terminal degree in their field;
3. Demonstrate continuing competence and achievement in research or scholarship appropriate for the discipline;
4. Demonstrate appropriate familiarity with University of Waterloo policies and procedures on graduate student supervision. This is preferably achieved by the faculty member attending a University-provided workshop or receiving training on supervisory procedures at the Faculty level;
5. Demonstrate appropriate supervisory experience: this can be achieved by the faculty member choosing one of the following:
   - Successfully completing a workshop series organized by the office of the Associate Vice-President, Graduate Studies and Postdoctoral Affairs, and facilitated by CTE on graduate supervision;
   - Having co-supervised or supervised a PhD thesis to completion (see Guidelines for Best Practice in Co-Supervision).

The above criteria are meant to ensure that faculty members have acquired the appropriate knowledge to facilitate
excellent PhD supervisors at Waterloo. For new faculty, ADDS status is to be awarded on potential excellence since building a proven track record of successful graduate supervision requires many years, numerous students and, depending on the discipline, can extend beyond the granting of tenure.

### Acquiring ADDS Status

The process of acquiring ADDS status for a faculty member in the tenure-stream at the University of Waterloo is defined as follows:

- Faculty members satisfying all 5 criteria for qualification listed above can request consideration for ADDS status by their Department Chair;
- The Chair must confirm all 5 criteria are met and then pass along the request and any written comments to the Faculty Associate Dean, Graduate Studies for approval;
- If the Chair deems that any of the 5 criteria are not met, s/he will provide the faculty member in writing information as to which criteria are not met and guidance as to how to satisfy those criteria in order to become eligible. Faculty members can appeal the Chair’s negative decision to the Faculty Associate Dean, Graduate Studies and (in the event of a negative decision from the Faculty Associate Dean) to the Associate Vice-President, Graduate Studies and Postdoctoral Affairs;
- Individual Faculties may opt to constitute an appropriate advisory committee to the Associate Dean, Graduate Studies to adjudicate ADDS status requests;
- After the application is approved by the Faculty Associate Dean, Graduate Studies the recommendation for the granting of ADDS status will be forwarded to the Associate Vice-President, Graduate Studies and Postdoctoral Affairs for approval;

satisfactory graduate student supervision at Waterloo.

For new tenure stream faculty, SSPS2 is to be awarded on potential excellence since building a proven track record of successful graduate supervision requires many years, numerous students and, depending on the discipline, can extend beyond the granting of tenure.

### Acquiring SSPS2

The process of acquiring SSPS2 for a faculty member in the tenure stream at the University of Waterloo is defined as follows:

- Faculty members satisfying all five criteria for qualification listed above can request consideration for SSPS2 by their Department Chair;
- The Chair will evaluate the candidate’s having satisfied all five criteria and, when those criteria are deemed to be met, recommend the approval with any written comments to the Faculty Associate Dean, Graduate Studies;
- The Faculty Associate Dean, or (at the discretion of the Associate Dean) an appropriate advisory committee, will evaluate the candidate’s SSPS2 qualifications and, when the qualifications are deemed to be satisfied, will recommend the granting of SSPS2 by the Associate Vice President Graduate Studies and Postdoctoral Affairs;
- The Associate Vice-President, Graduate Studies and Postdoctoral Affairs will vet the request and determine if SSPS2 will be granted; If either the Faculty Associate Dean, Graduate Studies or the Associate Vice-President, Graduate Studies and Postdoctoral Affairs does not approve SSPS2 at the present time, s/he will provide in writing guidance as to what is needed for the faculty member to become eligible. Faculty members can appeal denial of SSPS2 status by the Faculty Associate Dean to the Associate Vice-
If either the Faculty Associate Dean, Graduate Studies or the Associate Vice-President, Graduate Studies and Postdoctoral Affairs does not approve ADDS status at the present time, s/he will provide in writing guidance as to what is needed for the faculty member to become eligible. Faculty members can appeal denial of ADDS status by the Faculty Associate Dean to the Associate Vice-President, Graduate Studies and Postdoctoral Affairs.

Retired Faculty

Those faculty members who are supervising doctoral students when they retire may continue to sole-supervise these students until these students complete their degrees.

Adjunct Faculty and Research Professors

Co-supervision with a regular faculty member with ADDS status is normally a requirement for Adjunct Faculty and Research Professors. The Faculty Associate Deans, Graduate Studies, have the authority to waive the co-supervision requirement for a specific student, on the recommendation of the Department/School.

Revoking ADDS Status

When circumstances appear to warrant the revocation of ADDS status of a faculty member; the process for doing so is as follows:

- The Chair/Director of the faculty member's unit will recommend revocation of ADDS status to the Faculty Associate Dean, Graduate Studies. Justification for the recommendation should be provided in writing, along with information on efforts that have been made for remediation, and the faculty member in question should be notified in writing.

Retired Faculty

Those faculty members who are sole-supervising graduate students when they retire may continue to sole-supervise these students until these students complete their degrees. A retired faculty member may not begin a new sole-supervisory role.

Revoking SSPS

When circumstances appear to warrant the revocation of SSPS1 or SSPS2 of a faculty member, the process for doing so is as follows:

- The Chair/Director of the faculty member's unit will recommend revocation of SSPS (SSPS1, SSPS2 or both) to the Faculty Associate Dean, Graduate Studies. Justification for the recommendation should be provided in writing, along with information on efforts that have been made for remediation, and the faculty member in question should be notified in writing.
advance of the recommendation and the reasons for it;

- The Faculty Associate Dean, Graduate Studies may reject the recommendation but must provide a written explanation for doing so;
- In some cases information may come to the attention of the Faculty Associate Dean, Graduate Studies, suggesting that revocation of ADDS status should be considered. In such circumstances, s/he should approach the Chair/Director to investigate, and if appropriate initiate the process;
- If the Faculty Associate Dean, Graduate Studies accepts the Chair/Director’s recommendation, the faculty member may appeal the decision to the Associate Vice-President, Graduate Studies and Postdoctoral Affairs, whose decision is final; the Associate Vice-President, Graduate Studies and Postdoctoral Affairs shall provide reasons for the decision in writing;
- If ADDS status is revoked, the Faculty Associate Dean, Graduate Studies will notify Graduate Studies and Postdoctoral Affairs to update the University list;
- Faculty members whose ADDS status has been revoked have the opportunity to requalify for ADDS status, if they can demonstrate the appropriate competencies required.

Other

- All faculty members of a Faculty Graduate Studies Committee should hold ADDS status.

advance of the recommendation and the reasons for it;

- The Faculty Associate Dean, Graduate Studies may reject the recommendation but must provide a written explanation for doing so;
- In some cases, information may come (normally from members of a student’s advisory committee) to the attention of the Graduate Officer in the student’s home program, or the Faculty Associate Dean, Graduate Studies in the student’s home Faculty, suggesting that revocation of SSPS should be considered. In such circumstances, they should approach the Chair/Director to investigate, and if appropriate initiate the process;
- If the Faculty Associate Dean, Graduate Studies accepts the Chair/Director’s recommendation, the faculty member may appeal the decision to the Associate Vice-President, Graduate Studies and Postdoctoral Affairs, whose decision is final; the Associate Vice-President, Graduate Studies and Postdoctoral Affairs shall provide reasons for the decision in writing;
- If SSPS2 is revoked, the Faculty Associate Dean, Graduate Studies will notify Graduate Studies and Postdoctoral Affairs to update the University list;
- A faculty member who has had their SSPS2 revoked shall not be eligible to sole-supervise PhD students;
- A faculty member who has had their SSPS1 revoked shall not be eligible to sole supervise Master’s students;
- Faculty members whose SSPS has been revoked have the opportunity to requalify for SSPS. The necessary steps to have SSPS reinstated, including possible pathways to address the unsatisfactory competencies which led to the revocation, shall be communicated to the faculty member at the time of the revocation.
Departments/Schools not offering PhD programs would be exempt.

- Faculty members from departments that do not have a PhD program may acquire ADDS status and supervise graduate students from other departments within their Faculty where departmental regulations permit.
- An interim supervisor, who supports a graduate student during a supervisor’s absence during a planned (e.g., sabbatical) or unplanned (e.g., medical) leave, is not required to hold ADDS status.

Other

- All faculty members of a Faculty Graduate Studies Committee should normally hold SSPS2 or serve as a Graduate Program Director.
- An interim supervisor, who supports a graduate student during a supervisor’s absence during a planned (e.g., sabbatical) or unplanned (e.g., medical) leave, is not required to hold SSPS2.

Graduate students’ supervisors and committees

This is a new calendar section found under the heading:

Graduate academic roles and program requirements

- Graduate students’ supervisors and committees

Graduate students’ supervisors and committees

The University of Waterloo strongly encourages regular and productive engagements between graduate students, their supervisors and committees that are purposefully constituted to promote students’ attainment of their goals. The University recognizes the value of diverse areas of scholarship and lived experiences of those who support graduate students’ research. This section of the calendar defines and provides the regulatory frameworks for graduate student research committees.

The University defines the following roles in support of graduate students:

**A Supervisor** is the primary point of contact for a graduate student. The supervisor meets or exceeds the expectations articulated in the roles and responsibilities of supervisors typically a combination of academic, administrative, funding, and personal supports for the graduate student.

**A Co-supervisor**, when appropriate, may share the responsibilities of the Supervisor. Co-supervisory arrangements are desirable when the co-supervisors have complementary knowledge, skills, academic training, professional networks, or other attributes that benefit the student. Co-supervisory relationships may
also provide more timely administrative support for graduate students. No more than two co-supervisors are permitted.

Normally, the supervisor’s or one of the co-supervisor’s faculty appointment will be in the academic unit administering the student’s program.

An Advisory Committee is formed to provide academic, professional and personal support to graduate students and their supervisors. Because of the broad mandate of the Advisory Committee, membership may be purposefully large, including members internal and external to the University with disparate training and experience, provided that a proposed member can contribute meaningfully to the student’s academic endeavors.

The advisory committee (as a whole or select members) may also play roles in evaluating a graduate student’s academic progress related to their research.

An Examining Committee evaluates a graduate student’s performance on major academic milestones which, at the PhD level, may include comprehensive or qualifying exams, research proposals, and thesis defenses.

At the Master’s level, an Examining Committee may be constituted, typically to evaluate a student’s proposal or thesis.

In many instances, there will be common membership between a student’s advisory committee and the student’s examining committee, though examining committees are typically composed of those with academic credentials that are equivalent to the student’s degree program.
### Summary of Supervisory Roles and Advisory Committee Membership [6]

[1] with co-supervisor with SSPS2 status  
[2] with Associate Dean (Graduate Studies) approval  
[3] with Graduate Officer approval  
[4] including retired faculty members who maintain adjunct status  
[5] Teaching Stream faculty who can demonstrate an active research program and knowledge of the university’s administrative structures associated with graduate studies, may apply for SSPS1 following the process outlined for Tenure Stream Faculty seeking SSPS2.  
[6] non-conforming, existing privileges held by faculty members prior to the adoption of these regulations will be retained, as appropriate.

In unique circumstances, the Associate Dean Graduate Studies in the student’s home Faculty may recommend to the Associate Vice President Graduate Studies and Postdoctoral Affairs (AVP-GSPA) a supervisory or advisory relationship that differs from the regulations presented here. The AVP-GSPA shall make the decision to approve or reject the proposed relationship.

The following section provides the regulatory framework for graduate supervision at Waterloo.
PhD Supervisors

In order to sole-supervise PhD students, the proposed supervisor must be a tenure stream member of the University faculty with Sole Supervisory Privilege (SSP2) status. When a proposed supervisor does not have SSPS2 status they may co-supervise with a colleague who satisfies the requirements for sole-supervision.

Similarly, colleagues external to the University of Waterloo who hold adjunct positions at the University may, at the discretion of the Associate Dean Graduate Studies in the student's home Faculty, co-supervise with a colleague who satisfies the requirements for sole-supervision when:

- The adjunct holds a PhD in a related discipline; and
- The adjunct remains active in research.

Research Professors and Teaching Stream faculty are permitted to serve as co-supervisors for PhD students. Postdoctoral scholars may not serve as supervisors or co-supervisors for PhD students.

A faculty member who is sole-supervising PhD students at the time of their retirement may continue to sole-supervise those students to completion. Following their retirement, faculty members may not begin sole-supervising new students.

Masters Supervisors

Any tenure stream faculty member who holds SSPS1 status at the University of Waterloo may sole-supervise research master's students. Faculty members without SSPS1 status may only sole-supervise Research Master's students with approval from the Associate Dean, Graduate Studies, in the student's home Faculty.

Teaching stream Faculty who wish to sole supervise Master's students may seek SSPS1. Teaching Stream Faculty seeking SSPS1 will follow the process outlined for Tenure Stream Faculty pursuing SSPS2. To qualify, Teaching Stream faculty shall demonstrate an active research program and knowledge of the university’s administrative structures associated with graduate studies.

Co-supervision by other members of the university community (e.g., postdocs, research associate professors, adjunct faculty) is permitted at the discretion of the Graduate Officer in the student’s home unit when:

- the co-supervision adds value to the student’s learning outcomes (e.g., research or professional development) and
- for internal members of the university, the role of co-supervisor is permitted by the terms of the proposed co-supervisor's appointment.
Advisory Committee

Purpose and Functions

A student’s Advisory Committee acts as a partner with the student and the supervisor(s) in guiding and advising the student on research and assisting supervisor(s) in their monitoring functions. Advisory committee members provide the student with expert guidance or advice in specific areas of the student’s research work; for the supervisor(s), advisory committee members provide critical and constructive feedback on the student’s research. Procedures for appointing and confirming advisory committees will vary between Faculties.

Collectively, advisory committees are intended to be sources of support to supervisors and students in promoting the resolution of issues and promoting positive academic outcomes. As such, advisory committees can and should play a role in identifying and communicating shortcomings in faculty members’ supervisory practices.

Advisory committees (in full or in part) in some Faculties provide regular (at least once per year), formal assessments on students’ academic progress, the successful attainment of which is necessary for a student to remain in Good Standing.

Advisory committees are mandatory for PhD students and are recommended for research Master’s students.

Membership and Voting

Advisory committees must include the student’s supervisor(s) and at least two other full-time faculty members from the University of Waterloo whose complementary fields of expertise will support the planning and execution of the student’s research work.

Advisory Committees may include additional members, internal or external to the University, who possess expertise that will add value to the student’s research work. Adjunct status is recommended for external members of an advisory committee but is not required.

When an Advisory committee is performing an evaluative role for the student, such as assessing academic progression through committee meetings, additional members (other than the supervisor(s) and two Waterloo faculty members) will normally not be voting members of the committee. Exceptions can be made by the Associate Dean Graduate Studies in the student’s home Faculty, on the recommendation of the student and the supervisor(s).

The role(s) of advisory committees should be made clear to both the committee members and the student, including the role in supporting and evaluating academic progression.
The minimum membership of a PhD student’s advisory committee shall be the supervisor(s) plus two regular members of the University faculty, at least one of whom will have their primary appointment in the student’s home academic program.

The University recommends the formation of the advisory committee as soon as is practical. For PhD students, the committee shall be established not later than the month following the student’s successful completion of the Comprehensive or Qualifying exam.

**Jurisdiction on Membership**

Normally, the composition of a PhD student’s advisory committee shall be jointly decided by the student and the supervisor(s) and communicated to the Graduate Officer in the student’s home unit.

In some Faculties, membership of the Advisory Committee is at the discretion of the Associate Dean Graduate Studies.

**Distinction between Advisory and Examining Committees**

The primary role of the advisory committee is to provide support/feedback to the student throughout their research progression.

The primary role of the examining committee is to serve as evaluators of graduate students’ research work at defined points coinciding with PhD comprehensive exams, PhD thesis defenses and where appropriate, Master’s defenses.

The examining committee evaluates the suitability of the student’s research relative to the discipline and the stated degree level expectations of the student’s level of study. In many cases, there will be overlap in membership of these committees. However, there may be members of the advisory committee who do not meet the requirements for membership on the examining committee.

A member of a student’s advisory committee, who is not part of the examining committee, is not required to be a part of an examination. However, it is recognized that there may be value in the participation of all advisory committee members and thus, members are encouraged, where possible and appropriate, to play an active role in a student’s examination (as a non-voting participant). This may include asking questions of the candidate during oral components of a comprehensive exam or a defense.

The membership of Examining Committees for PhD students is defined for comprehensive exams and for defenses. For Master’s programs, see Master’s degree with thesis.

Where applicable, the membership of Examining Committees for master’s students is specified by the Faculty or the Academic Unit delivering the student’s academic program.
To: Senate

Sponsor: David DeVidi
Associate Vice-President, Academic

Presenter: David DeVidi

Contact Information: david.devidi@uwaterloo.ca

Date of Meeting: June 10, 2024

Agenda Item Identification: 12(a) Report – Senate Undergraduate Council: Major Modification – Recreation and Leisure Studies & Recreation and Sport Business

Recommendation/Motion:
To approve the proposed major modifications to Recreation and Leisure Studies (Bachelor of Arts - Honours), and Recreation and Sport Business (Bachelor of Arts - Honours), effective September 1, 2025, as presented.

Summary:
Senate Undergraduate Council met on April 9, 2024 and agreed to forward the following items to Senate for approval as part of the regular agenda. These items were presented at the May 6, 2024 Senate for approval, and following questions that could not be answered in the meeting, the items were withdrawn. These items are being brought forwarded again to Senate, as part of the regular agenda, with responses to the questions and comments from the May 6, 2024 Senate meeting, provided in Appendix C.

Jurisdictional Information:
This item is being submitted to Senate in accordance with Senate Bylaw 2, section 5.03(b): “Make recommendations to Senate with respect to new undergraduate programs/plans, the deletion of undergraduate programs/plans, and major changes to undergraduate programs/plans.”
**Governance Path:**

Health Faculty Council approval date (mm/dd/yy): 03/22/24
Senate Undergraduate Council approval date (mm/dd/yy): 04/09/24
Senate approval date (mm/dd/yy): 05/06/2024 (withdrawn)

**Highlights/Rationale:**

These proposed is revisions are to 1. revise plan name and requirements for Honours Recreation and Leisure Studies, and 2. Revise the plan name for Honours Recreation and Sport Business, as presented in Appendices A and B.

1. **Recreation and Leisure Studies**

   To change the plan title to Recreation, Leadership, and Health, and revise the requirements as presented in Appendix A.

   Through alumni and student surveys, coop consultation, and interviews with various partners, the Department of Recreation and Leisure Studies has revised their recreation and leisure studies program. Through this revision, they are highlighting the ways in which recreation and leisure can enhance the wellbeing and health of communities and its members. Graduates from the program will be well positioned to become leaders in recreation and community organizations, and make their respective communities more inclusive spaces for all people.

   Students currently enrolled in the Recreation and Leisure Studies program will have the option to follow the existing or the revised curriculum. Consultation has been conducted with current students, alumni, cooperative education and community organization.

   Approvals have been granted by the following University of Waterloo units – Political Science, Social Development Studies, Faculty of Environment, Peace and Conflict Studies, School of Public Health Sciences, English. The Faculties of Arts, Math and Science have been informed of the change to remove our Restricted Electives.

2. **Recreation and Sport Business**

   To change the plan title to Sport and Recreation Management, as presented in Appendix B.

   The revised name better reflects the curriculum and the evolution of the field in theory and practice. The revised name also reflects a wider scope of sectors (public, non-profit, and business) that their students study and work. Current students and alumni have also been consulted and have demonstrated support for this change. Current students can choose to switch to the revised plan name and calendar rules after September 1, 2025, or remain with the previous plan name.

- REC 312 - Practicum in Recreation, Sport, and Tourism
1. **Question about including a course that covers Indigenous themes. Recommendation to have some Indigenous-based course content (e.g. INDG 201).**

Much consideration and thought were put into the development of Recreation, Leadership, and Health. It represents the only Bachelor of Arts program at the University of Waterloo which requires all the following thematic areas: Indigeneity, Diversity and Inclusion, Sustainability, and wellness of individuals and society.

The Recreation, Leadership and Health program is proud to include REC 230 as one of its required courses. After much consultation, REC 230 has been revised to include Indigenous-led land-based learning initiatives. It integrates experiential learning with critical thinking and applied skills to explore how ideas and practices of Indigenization, reconciliation, and decolonization relate to the community and health benefits often associated with outdoor leisure, sport, tourism, and events.

2. **Question about the number of Laurier business courses listed in the plan. A number of the themes covered in the WLU courses are also offered by UW courses (either by MGMT, BET or ENBUS courses). For example, BUS452W Marketing Strategy (WLU) is listed as an approved course but MGMT 345/ARBUS 303 Marketing Strategy is not listed as an option.**

The University has a long-standing agreement with Wilfrid Laurier University that provides Recreation and Sport Business students with the opportunity to take Laurier business courses. In 2021, the Department of Recreation and Leisure Studies removed the only required WLU course, BUS 121W, from the Recreation and Sport Business program. All other WLU courses were and are optional. This permits flexibility in scheduling for our students. Many of the BET courses are offered in the evening hours, which is problematic for many of our student athletes, student commuters, and students who work at night to support themselves in their studies.

3. **There is no required or suggested course relating to sustainability or indigenous content. I would say that this is a missed opportunity to integrate these themes into the program given the importance both will hold in future decision making and planning of sport; ENBUS 211 Principles of Marketing for Sustainability Professionals is an example of a course that would be relevant to this program and would cover but business and sustainability issues. ENBUS 314 (Sustainable Business Models) is another example.**

The Recreation and Leisure Undergraduate Studies Committee decided to take a phased approach with the review of the Sport and Recreation Management degree program. The title was prioritized so that students would be able to recognize the focus of the program. Phase two of the revision will focus on updates to the restricted electives list and exploration of any new courses to be added as required content. Sustainability is a key theme that can be strengthened throughout the program. Sustainability content is currently included in REC 219, which is a required course in the Sport and Recreation Management program. Revisions to an existing 4th-year course will have a direct tie to sustainability and sport content, as well as the SDGs. ENBUS 211 Principles of Marketing for Sustainability Professionals is an antirequisite to MGMT 244 and ARBUS 302. The program requires that a student completes one of the courses from that list.
4. **The MUSIC353W appears 3 times in the proposal distributed with the May 2024 Senate agenda, once corresponding to 2.5 credits (p.35 of the May package), another as 4.0 credits (p.40 of the May package), and another as 6.5 credits (p.36 of the May package), and yet the course itself doesn't (yet?) appear in the academic calendar.**

MUSIC 353W is titled Inclusive Arts for Children. Wilfrid Laurier's Music Therapy program offers this course in partnership with KidsAbility Centre for Child Development. The course combines theoretical and practical learning in the creative arts, culminating in students' provision of leadership at an inclusive creative arts day camp with KidsAbility. The course focuses on important elements within the field of Recreation, including programming, evaluation, youth, inclusion, diversity, and fostering community. It has been recognized for over 25 years as an important community partnership and an academic experience worthy of a 0.50 REC elective credit. This course is incredibly impactful for students who wish to apply to graduate or professional programs, such as teacher education, occupational therapy, child life specialist, etc.

5. **My other concern is that all the language and humanities requirements are being removed (p.34 of the package), which will lead students in this program to have less breadth in their academic experience, and more broadly, represents another manifestation of the not-so-slow erosion of UW away from being a comprehensive university, and closer to being a technical training college.**

The Recreation, Leadership, and Health degree program is interdisciplinary. It includes content that covers the humanities, specifically with respect to the philosophy of leisure, the social history of leisure provision, and the culture of leisure communities. Currently, students in Recreation and Leisure Studies must complete a total of four courses from 12 subject categories, with only one course per category. With 12 subject categories, it is possible that students may opt to take four courses in subject categories other than languages and humanities. With the Recreation, Leadership, and Health degree proposal, students will be required to take ENGL 210F or ENGL 210G; one of LS 271, PACS 202, or PACS 313; PSCI 100 or SDS 231R, and PSYCH 101/101R. In addition, there are 6.5 units of elective course. Ultimately, this degree reflects Recreation and Leisure Studies' commitment to a liberal education.

Date of Meeting: June 10, 2024

Agenda Item Identification: 13(a) Report – Senate Honorary Degrees Committee:
Revision to the Distinguished Professor Emeritus/a Guidelines

Recommendation/Motion:
To approve the revisions to the Distinguished Professor Emeritus/a Guidelines, as presented.

Summary:
The Honorary Degree Committee met on May 17, 2024 and agreed to forward the following item to Senate for approval as part of the regular agenda.

Proposed revisions to the Distinguished Professor Emeritus/a Guidelines are being brought forward for consideration by Senate. The revisions are presented in Appendix A and include:

- Limiting the number of distinctions awarded each year to 10% of the annual number of full-time regular faculty member retirements, averaged over the past five years;
- Introducing guidance on selection criteria relative to “distinguished record of service in teaching and research”; and
- Introducing a nomination form.

Dean’s Council (DC+) has been consulted on these revisions.
Jurisdictional Information:

As provided for in its Terms of Reference, the Senate Nominating Committee for Honorary Degrees is empowered:

2. To consider and make recommendations to Senate for the conferring of the title "Distinguished Professor Emeritus" on those candidates who meet the established criteria.

Governance Path:

Honorary Degree Committee (mm/dd/yy): 05/17/2024

Background:

The guidelines were introduced in 1994 and have been revised three times as follows:

- To delegate authority to the President to grant the designation on Senate's recommendation (1996);
- To remove listing of names in University Calendars (2003); and
- To provide clarification on timing (2009).

Current criteria for the designation are as follows:

- The faculty member shall have a distinguished record of service in teaching and research in the University for a period of time, normally 15 years;
- The faculty member is recommended for the designation by their Chair, their Dean, the Honorary Degrees Committee, and Senate; and
- That the designation shall normally be granted upon or shortly after retirement, regardless of rank.

To preserve the prestige of the designation, a limitation on the number of awards is proposed, with a specific number to be determined by the Committee. There are currently no limits, but Waterloo has awarded an average of six DPE's annually within a range of 1 to 15 as the most awarded in a given year. None were awarded in 2020 due to convocation being postponed. This year, 11 have already been approved with three additional nominations being submitted for consideration. Introducing the 10% of the annual number of full-time regular faculty member retirements, averaged over the past five years limit will result in fewer number of awards. Based on the previous years' retirement numbers, the Waterloo would average 2-3 awards annually. The word normally is used to allow for exceptions as necessary. As the number is reduced, the Committee would only consider nominations once a year.

The Distinguished Professor Emeritus/a designation is relatively rare among Canadian universities as Waterloo provides Professor Emeritus to everyone if they meet 15 years of service and the recognition then becomes 'Distinguished Professor Emeritus'. Other comparators have competitive processes for Professor Emeritus and most provide more selection criteria for their distinction. The proposed detailed selection criteria are drawn from the UW University Professor criteria and other institutions’ selection criteria identified in an environmental scan.
They are designed to assist both nominators in writing their nominations, and approvers in assessing which
nominations to recommend for approval, and to support consistency and preserve the prestige of the honour.

The Committee has recently introduced a nomination form for Honorary Degree Nominations which has been
useful in simplifying the process for nominators and standardizing the nominations to ensure that each
nomination has a base level of comparable information for the Committee to review. The proposed nomination
form (see Appendix B) is based on the Honorary Degree form and hopes to achieve similar results for Distinguished
Professor Emeritus/a nominations.

**Documentation Provided:**

Appendix A – Proposed Revisions to the Distinguished Professor Emeritus/a Guideline

Appendix B – Proposed Nomination Form
The award of Distinguished Professor Emeritus/a is made to individuals under the following conditions:

1. The honorary award shall normally be granted upon or shortly after retirement, regardless of rank, and continue for life. The award shall carry no duties or obligations on the part of the individual or on the part of the University.
2. The faculty member shall have had a distinguished record of service in teaching and research in the University for a period of time, normally 15 years.

Those who are awarded Distinguished Professor Emeritus/a will continue to receive the services and privileges extended to all retired faculty members. Additional privileges are at the discretion of the appropriate Department Chair and Faculty Dean, to be determined on a case-by-case basis.

Nomination Process

The recommendation for this honour shall rest with the Department which, through its Chair, will submit to the Dean a nomination form with the proposal that a retired or retiring member of faculty be given the honour. Having approved the recommendation, the Dean shall forward it to the Faculty’s Honorary Degree Committee which will, in turn, forward it to the Senate Nominating Committee for Honorary Degrees. If the Senate Committee accepts the recommendation, the Committee shall forward it to the Senate; if Senate approves, it will recommend to the President that the Distinguished Professor Emeritus/a award be granted. The designation of a person as “Distinguished Professor Emeritus/a” will normally be conferred at Convocation.

The number of individuals honored with this distinction in any one year should not normally exceed 10% of the annual number of full-time regular faculty member retirements, averaged over the past five years.

Selection Criteria

The following criteria will be used when assessing nominees’ “distinguished record in teaching and research”:

- Remarkable impact on the University of Waterloo;
- Exceptional scholarly achievement and international pre-eminence in a particular field or fields of knowledge, sustained over a substantial career;
- Excellence and/or innovation in teaching and learning, and an outstanding reputation in student supervision, mentorship and educational leadership; and
- Exemplary commitment to the mission, vision and values of the University of Waterloo.

It is not expected that every nominee meets all of the selection criteria listed above, this list is meant to serve as a guide for nominators and assessors.

Awards of Honour in Absentia

Normally, an individual invited to a Convocation ceremony to receive an honorary degree, the distinction “Distinguished Professor Emeritus/a” or the title “Honorary Member of the University” is expected to be present. However, under truly exceptional circumstances where an individual is prevented from
present. However, under truly exceptional circumstances where an individual is prevented from attending because of accident or infirmity and where it is not practicable for the award to be made at a subsequent Convocation, the honour may be awarded in absentia.
Please complete this form and submit it with the required attachments to secretariat@uwaterloo.ca by November 1, 2024 at 4:30pm at the latest. See the Criteria for Distinguished Professor Emeritus/a for information on what to include in the nomination package, the selection guideline, and criteria. A nomination package checklist is included at the end of this form.

Date of Meeting: June 10, 2024

Agenda Item Identification: 13(b) Report – Senate Honorary Degrees Committee:
Revision of the Criteria Honorary Member of the University

Recommendation/Motion:

To approve the revisions to the Criteria for Honorary Member of the University, as presented.

Summary:

The Honorary Degree Committee met on May 17, 2024 and, on the recommendation of the Honorary Member of the University Committee, agreed to forward the following item to Senate for approval as part of the regular agenda. The following revisions to the Criteria for Honorary Members of the University are proposed:

Propose:

The Committee proposes providing more clarity and guidance for faculty member nominations, specifying that the Committee will consider a broad range of faculty members’ service.

Criteria:

To ensure that individuals are recognized closer to their date of retirement, the Committee proposes that the criteria be revised to allow nominations to be submitted and considered ahead of retirement, once it is known that the nominee is set to retire. The designation would not be granted or recognized until the nominee has retired. This would also bring the criteria in line with the Criteria for Distinguished Professor Emeritus in which nominations can be submitted and considered prior to retirement. The Committee also proposes to limit nominations for those who have retired to be submitted within 1 year of their retirement. The word normally is used to allow for exceptions as necessary.
Nomination Package:
Following recent changes to the Honorary Degree Nomination Process, the Committee proposes that the Honorary Members to the University nominations also introduce a nomination form to help standardize the nominations. A proposed nomination form is attached as Appendix B. The nomination form is based on the nomination form for Honorary Degree nominations and is designed to simplify the process for nominators and ensure that each nomination has a base level of comparable information for the Committee to review.

The Committee would also like to acknowledge that not all staff members who are retiring maintain an updated resume and proposes updating the criteria to reflect this by adding the alternative of ‘a summary of work history’ as a requirement for the nomination package. The Committee’s current practice is to accept resume alternatives but feels that the current language might be a deterrent for potential nominators who are unable to obtain the resume of the nominee and are unaware of this practice.

Annual Maximum Individual Honored
The Committee proposes to increase the maximum number of individuals honored annually from four to six. The word normally is used to allow for exceptions as necessary. The number of employees has significantly grown since the honour was established in the 1970's, however, the maximum number of individuals to be honored annually has not. The Committee feels strongly that this maximum should be increased to ensure that deserving individuals are not disregarded due to this limit. The Committee reviewed employee data from HR and IAP and felt increasing the maximum to six was a good compromise to accommodate the growth of the university while keeping this honour prestigious.

Jurisdictional Information:
This item is being submitted in accordance with the Honorary Degrees Committee’s Terms of Reference, section 3: “To consider and make recommendations to Senate for the conferring of the title “Honorary Member of the University” on those candidates who meet the established criteria. Nominations will be forwarded to the Senate Committee from the Honorary Member of the University Committee. The Senate Committee will also be responsible for appointing members to the Honorary Member of the University Committee."

Governance Path:
Honorary Member of the University Committee (mm/dd/yy): 04/03/24

Honorary Degree Committee (mm/dd/yy): 05/17/2024

Documentation Provided:
Appendix A – Proposed Revisions to the Criteria for Honorary Members to the University
Appendix B – Proposed Nomination Form

Honorary Degree Committee
Criteria for Honorary Member of the University
Guidelines for Awarding the Honorary Member of the University Designation

Purpose
The Honorary Member of the University designation recognizes employees for outstanding service to the University as a whole. It is the highest honour a staff member can attain at the University of Waterloo. For faculty members, it recognizes distinctive administrative or other broadly considered service to the University (as distinguished from Distinguished Professor Emeritus, which recognizes academic excellence).

Criteria
Staff and faculty of the University and of the Affiliated and Federated Institutions of Waterloo who are retiring or are within one year of retirement are normally eligible for nomination upon retirement. The designation shall normally be granted at the first convocation following retirement.

The designation is intended to recognize staff who, in addition to excellent departmental work, have contributed distinctive and distinguished service to the University as a whole and/or have made contributions beyond the University that have brought credit to the University. Involvements on multi-disciplinary efforts or university-wide collaborations and committee work or significant contributions to outside associations would be examples.

Members of the faculty should meet a higher standard than staff, in part because they are expected normally to assume a share of service activities on a regular basis. While the Distinguished Professor Emeritus designation is a higher award based on academic criteria, the Honorary Member designation for faculty is intended to recognize outstanding administrative or other service.

Nomination Process and Package
All nominations for “Honorary Member of the University” must be considered by the Honorary Member of the University Committee which will forward the names of those individuals whom it feels are qualified for the designation to the Senate Nominating Committee for Honorary Degrees for consideration. The Senate committee will then recommend to Senate that the individual(s) be awarded the title “Honorary Member of the University.” Senate is responsible for approving the title; convocation recognizes the award as described below.

Any staff or faculty member can initiate a nomination process within their units/departments/schools/faculties. All nominations must be submitted in writing; the nomination package should include:

- A nomination form.
- A letter of nomination signed by the senior executive/dean/department head/director of the nominee’s unit with particular reference to the stated criteria.
- A work resume or a summary of work history for staff nominees or a curriculum vitae for faculty nominees.
- Normally, a minimum of two (2) letters of support from colleagues or associates.
- Any other materials such as news articles, literature, etc. deemed appropriate.

Completed nomination packages should be sent to the secretary of the Honorary Member of the University Committee, c/o Secretariat, NH 3060. All information received by the committee is held in confidence.
Appendix A – Proposed Revisions to the Criteria for Honorary Members to the University

The number of individuals honored with this distinction should not normally exceed four-six in any one year.

Award Presentation
The investiture ceremony will typically take place during a convocation ceremony and will consist of a citation and the placing of a green silk stole embellished with the University of Waterloo crest at each end. Unless there are extenuating circumstances, the recipient is expected to attend the ceremony.

Special Topics for 2024-2025 to be Scheduled:

- President’s Anti-racism Task Force Update (PART)

For more information: secretariat@uwaterloo.ca
uwaterloo.ca/secretariat, NH 3060

¹ Annual item
² Board of Governors approval
³ Presented by the Vice-President Academic and Provost
⁴ Presented by the President and Vice-Chancellor, and Chair of Senate
⁵ Presented by the University Secretary
⁶ Leadership updates may include such topics as: Talent, We Accelerate Report, Communities (EDI, Sustainability), Waterloo International, etc.
Senate Graduate & Research Council

For Information  Consent Agenda  Open Session

To: Senate

Sponsor: Charmaine Dean
Vice-President, Research & International

Jeff Casello
Associate Vice-President, Graduate Studies and Postdoctoral Affairs

Presenter: Jeff Casello
Contact Information: jcasello@uwaterloo.ca

Date of Meeting: June 10, 2024

Agenda Item Identification: 17) Report - Senate Graduate & Research Council

Summary:

Senate Graduate & Research Council met on May 6, 2024 and agreed to forward the following items to Senate for information as part of the consent agenda. On behalf of Senate, the following items were approved:

1. Research Ethics
   Council approved the updates to the Human Research Ethics Board (HREB) and Clinical Research Ethics Board (CREB) Term of References.

2. Graduate Awards
   Council approved the following graduate awards:
   a. Samit & Reshma Sharma Graduate Scholarship in Quantum Information [endowment]
   b. Samit & Reshma Sharma Graduate Scholarship in Mathematics [endowment]
   c. Samit & Reshma Sharma Graduate Scholarship in Optometry and Vision Science [endowment]
   d. L’OEUF Massive Impact Graduate Award [trust]
3. Curricular Submissions

Council approved course changes for:

a. Faculty of Science (Biology; Earth Science)

Jurisdictional Information:

As provided for in Senate Bylaw 2, section 4.03, council is empowered to make approvals on behalf of Senate for a variety of operational matters:

c. Receive, consider, study and review briefs on any aspect of graduate studies and research from members of the university.

f. On behalf of Senate, consider and approve all new graduate courses, the deletion of graduate courses, and proposed minor changes to existing graduate courses and programs, and provide Senate with a brief summary of council’s deliberations in this regard. Any matter of controversy that might arise may be referred to Senate.

i. On behalf of Senate, consider and approve all new graduate scholarships and awards. Any matter of controversy that might arise may be referred to Senate.
Senate Undergraduate Council

For Information

Consent Agenda

Open Session

To: Senate

Sponsor: David DeVidi
Associate Vice-President, Academic

Presenter: David DeVidi
Contact Information: david.devidi@uwaterloo.ca

Date of Meeting: June 10, 2024

Agenda Item Identification: 18) Report – Senate Undergraduate Council

Summary:

Senate Undergraduate Council met on May 14, 2024 and agreed to forward the following items to Senate for information as part of the consent agenda. On behalf of Senate, the following items were approved:

1. Academic Program Reviews

Following the review of the report and presentation from the programs, Council approved the following report:

There were no issues noted in the report.

2. Curricular Submissions

Council approved new courses, course changes, course inactivations, and minor program and plan modifications for:

a. Faculty of Mathematics: (Mathematical Finance; Computational Mathematics; Computer Science; Computer Science and Software Engineering - Business Specialization; Data Science; Finance Specialization; Information Technology Management; Mathematical Business; Mathematics; Mathematics/Business Administration; Mathematics/Chartered Professional Accountancy; Mathematics/Financial Analysis and Risk Management - Chartered Financial Analyst Specialization; Mathematics/Financial Analysis and Risk Management - Professional Risk Management Specialization; Pure Mathematics)
Jurisdictional Information:

As provided for in Senate Bylaw 2, section 5.03, council is empowered to make approvals on behalf of Senate for a variety of operational matters:

c. On behalf of Senate; consider and approve all new undergraduate courses; the deletion of undergraduate courses; and proposed changes to existing undergraduate courses and minor changes to programs and/or plans; and provide Senate with a summary of council's deliberations in this regard. Any matter of controversy that might arise may be referred to Senate.
Office of the Vice President, Research and International

For Discussion

To: Senate

Sponsor: Charmaine B. Dean, Vice President Research and International
Contact Information: vpri@uwaterloo.ca

Presenter: Charmaine B. Dean, Vice President Research and International
Contact Information: vpri@uwaterloo.ca

Date of Meeting: June 10, 2024

Agenda Item Identification: 19) Report - Vice-President, Research & International - Awards, Distinctions, Grants, Waterloo International Engagements

Summary:

Presenting the Vice-President, Research and International Report to Senate for June 2024. This report to Senate highlights successful research, international and entrepreneurial outputs and outcomes for the period April 2024 by the thematic areas as outlined in Waterloo’s Strategic Plan 2020-25.

Documentation Provided:

- Vice-President, Research and International June 2024 Report to Senate
Introduction
This report to Senate highlights successful research and international outputs and outcomes for the period April 2024.

Velocity Highlights:

Darren Baine (BASc. - Biology and bioinformatics – in progress)
Young Eye International
Darren is a student in the BASc program with a focus on Biology and Bioinformatics. He has been on the Top 40 Under 40 list in Uganda as a social entrepreneur, speaker, mentor and author. In April, Darren launched the second season of his podcast Young Eye International, aimed at creating a socially connected world (watch the youtube video of the latest podcast) where he interviews Daria Margarit.

Daria Margarit (BA, Mathematics – Waterloo and BBA, Business Administration – WLU– in progress)
Safi
Daria is the co-founder of Safi and is currently working on a double degree at the University of Waterloo and Wilfrid Laurier University. She was featured in April as a Velocity student success story. Her team provides farmers with a solution for safe milk production in East Africa. At Velocity Digital and Science spaces, the team built and tested the pasteurization handles and received advisory from staff. They expanded their vision beyond the fully mechanical model, and prototyped battery-operated and corded models that heat the milk for the user directly instead of simply monitoring temperature while paired with an external heat source (watch the youtube video of the latest podcast).

Andrew Pundsack (BASc ’19 – Mechanical Engineering), Ashley Keefner (PhD ’17, MBET ’18) and Shane Kilpatrick (MASc ’17, MBET ’18)
Membio Inc.
Membio was featured in April as a Velocity story. The three co-founders joined Velocity after winning the Pitch Competition in 2018 when they were students in Engineering. The company’s tech is to manufacture cells in a more efficient way by replicating the human body with technology. Through assistance from Velocity science and winning the Velocity pitch competition they built prototypes to test their idea. Recently, ABEC- a global biomanufacturing company acquired Membio’s technology.

Emma Collington (BSc ’19, MSc ’22, PhD in progress - Biology) and Samantha Fowler (BSc ’19 – Biology)
Emma and Samantha were featured in April as Velocity advocates for inclusivity in STEM. They have launched, and lead, the project STEM with Disabilities, amplifying the visibility of scientists, engineers and others with disabilities in technology and math. Stemming from personal experiences as disabled students and scientists, their initiative began as a visibility campaign but has evolved into a community-building platform.
Rastin Rassoli (BA – in progress – Psychology)
Rastin was featured in April as a Velocity co-founder. His company - Colorful Zone - is a Velocity company that has developed an AI-powered app to support well-being and stress management for young adults. The Joyi app presents game-like features and bite-sized psychology lessons to cultivate skills for managing everyday stressors. It tailors content to individual users, offering personalized psychoeducational experiences to boost resilience.

Funded Research Awards:

Provincially funded Early Researcher Awards
Five Waterloo researchers will receive funding through the Early Researcher Awards program — a program that gives research funds to new researchers working at publicly funded Ontario research institutions to build a research team. Each award is valued at $100,000, and is matched by an additional $50,000 from Waterloo.

Karla Boluk – Associate Professor, Recreation and Leisure Studies
Equity-deserving groups have been under-represented in the entrepreneurial ecosystems in Ontario and COVID-19 has exacerbated this. The proposed study uses a feminist intersectional and care lens employing case study and grounded theory methodologies focused on the Toronto-Waterloo Technology Corridor

Paolo Dominelli– Assistant Professor, Kinesiology and Health Sciences
Understanding the impact of sex-differences in the pulmonary system on exercise
Chronic illness is a major financial and societal burden to Ontario, estimated at more than 55 per cent of the province’s total health care costs. Dominelli’s team seeks to further understand how sex-differences in the respiratory system impact the response to exercise to address the long-standing bias in exercise physiology where females are underrepresented in research, despite growing evidence of known differences that can impact exercise training and rehabilitation.

Logan Mac Donald – Associate Professor, Fine Arts
Longhouse Labs (LLabs)
The Longhouse Labs (LLabs) is a research-creation hub aimed at facilitating long-term engagement with Indigenous artists, curators, conservators and researchers through the creation of yearly residencies (or Fellowships) within fine arts.

Mahla Poudineh – Assistant Professor, Electrical and Computer Engineering
A new transdermal patch to continuously and without pain track and treat diabetes
Diabetes, if left unchecked, can cause serious illnesses leading to healthcare burden in Ontario. Patients with diabetes often require injecting insulin to balance their blood glucose level. Poudineh is developing a small, painless, wearable patch for people with type 1 diabetes which sends informative readings to their smartphones.
Yaoling Yu – Professor, School of Computer Science

Pushing-forward Deep Generative Models

Deep generative AI models are difficult and expensive to train because they require much data and computing power. In fact, training has become so expensive that often it is not possible to fix a bug discovered after a model has been trained. Professor Yu and his students will address these issues by creating lightweight generative models that require significantly less data, storage and computing power, by developing distributed systems that enable training on low-cost smart devices, and by accounting explicitly for concerns about trustworthiness.

Awards and Distinctions:

Ramon Aravena - Professor Emeritus, Earth and Environmental Sciences

Vernadsky Medal of the International Association of Geochemistry
The IAGC Vernadsky Medal is awarded biennially to a single person for a distinguished record of scientific accomplishment in geochemistry over the course of a career.

Hans De Sterck – Professor, Applied Mathematics

Fellow - the Society for Industrial and Applied Mathematics
De Sterck was recognized “for contributions to scientific computing methods including multilevel and nonlinear solvers, and for exemplary scientific leadership and service to SIAM.”

Ken Hirschkop – Professor, English Language & Literature

Sebeok-Love Award for Best Article in Language Sciences 2023 (awarded in 2024)
The editorial board and the publisher of Language Sciences confer the Sebeok-Love Award for the Best Article in Language Sciences on an annual basis. The award is given to the author of the best article from the journal’s six issue for the relevant year, as judged by the editors and editorial board.

Jenine McCutcheon – Assistant Professor, Earth and Environmental Sciences

Young Scientist Award - Mineralogical Association of Canada's (MACs)
This award is given to a young scientist who has made a significant international research contribution in a promising start to a scientific career.

Tizazu Mekonen – Associate Professor, Chemical Engineering

MSED Early Career Investigator Award, NOVA Chemicals
This honour is bestowed upon researchers who have made substantial contributions to the polymer industry, aligning perfectly with Mekonnen's disruptive research in polymer engineering and sustainability.

Alfred Menezes – Professor, Combinatorics and Optimization

Fellow - the International Association for Cryptologic Research
The Fellows program is awarded to no more than 0.25% of the IACR's 3000 members each year and recognizes “outstanding IACR members for technical and professional contributions to cryptologic research.”
Carol Ptacek – Professor, Earth and Environmental Sciences  
Fellow - International Association GeoChemistry  
The honorary title of IAGC Fellow is bestowed annually to scientists who have made significant contributions to the field of geochemistry.

Sherman Shen – Professor, Electrical and Computer Science  
International Fellow - Engineering Academy of Japan  
The Engineering Academy of Japan is composed of leading experts from academia, industry, and government institutions who possess a wide range of knowledge and have made outstanding contributions in engineering and technological sciences, and closely related fields.

Four Engineering Professors are awarded Fellows of the Canadian Academy of Engineering  
Canadian Academy of Engineering Fellows are selected for their outstanding contributions to engineering in Canada and around the world and for their service as role models in their fields and to their communities.

Ladan Tahvildari – Professor, Electrical and Computer Engineering  
Ehsan Toyserkani – Professor, Mechanical and Mechatronics Engineering  
Costas Tzoganakis – Professor, Chemical Engineering  
Alfred Yu – Professor – Professor, Electrical and Computer Engineering

Alexander Wong – Professor, Systems Design Engineering  
Fellow - Royal Society for the Encouragement of Arts, Manufactures and Commerce (commonly known as the Royal Society of Arts, or RSA).  
RSA is one of the oldest learned societies in the world comprised of “entrepreneurs, educators and innovators working together for the advancement of society, the economy and the environment.” Their mission is to “embolden enterprise, enlarge science, refine art, improve our manufacturers and extend our commerce”.

International Agreements:

Memorandums of Understanding (MOUs)

One new MOU and one MOU renewal were signed. These MOUs will enable the institutions to continue to explore collaboration across a range of areas including joint research projects, staff and graduate student exchange, seminars and conferences:

NEW - University of Jordan (Jordan) - This is a new institution-wide MOU.  
RENEWED - Korea Advanced Nano Fab Center, Gyeonggi Provincial Government, and Sungkyunkwan University (South Korea) -This MOU renewal involves Waterloo Institute of Nanotechnology (WIN).

NEW - Funding agreement - Directorate General of Higher Education of the Ministry of Education, Culture, Research, And Technology of the Republic of Indonesia for the Indonesia International Student Mobility Award. This agreement provides funding to students from Indonesia to study for a term at Waterloo.
International delegations hosted at the University of Waterloo:

**Birla Institute of Technology & Science, Pilanai, India (BITS)** – Waterloo International hosted a delegation from BITS regarding the exploration of collaborative activities with key stakeholders in the Faculty of Engineering, Faculty of Science, Waterloo Artificial Intelligence Institute (Waterloo.AI) and Waterloo Institute for Nanotechnology (WIN).
