Audio Lab

This Audio Lab is designed for the exploration of sound in its digital form, especially as it relates to commercialization, gamification, and the design of forward thinking user experience.

The lab is for use by students, faculty, and staff. Any person found violating the Audio Lab Policies below or the general Equipment Use Policies is subject to having his or her use privileges revoked.

Crucial Policies

• Ensure you have watched the Audio Lab Tutorial before beginning your first project.

• If the Audio Lab is being used for non-academic work, ensure you have read the additional guidelines, completed the online form, and received permission.
  • Forms and tutorial are available through the UWaterloo Stratford Campus website

• You may only use the Audio Lab if you’ve booked a slot online. You may do this at http://audiolab.youcanbook.me

• NO food or drink is allowed in the lab
  • The only permissible exception is a sealed water bottle. In this case, water bottles may not be placed on the workstation desk at any point

• Never touch the KRK ROKIT reference monitors. They are extremely delicate and can be damaged easily

• Always save your work to external storage at the end of your session. This is a shared computer and your work may be deleted at any time

• When you’re finished working, re-arrange the lab so it is as tidy as you found it, and simply log off from the Mac. Do not power off any equipment

Hours and Availability

The lab is open for use from 9 AM - midnight, Monday-Friday, and from noon-8:00pm, Saturday and Sunday. The lab will be closed on statutory holidays.

Help

For audio lab assistance, please contact:

   Jordan Mandel
