EVERGREEN

For over 30 years, Evergreen has been facilitating change in communities through connection, innovation and sustainable actions. They work with community builders across sectors to solve some of the most pressing issues cities face: climate change, housing affordability, and access to nature and public spaces.

A GREENER FUTURE

A Greener Future preserves the environment through litter cleanups, education and events. Litter can be found in every corner of the planet, even at the bottom of the ocean. The beauty of our natural landscapes and the health of all species on Earth are threatened by the waste we're leaving behind. A Greener Future aims to protect the planet from litter accumulation, but they cannot achieve their goals alone.
