

**Antonio Pecora**, CISA, CISM, CRISC, CGEIT, is a Director of Information Technology Inspections at the Canadian Public Accountability Board (CPAB). He has a specialized focus in Banking & Capital Markets specifically in the areas of IT risk and controls, controls optimization and regulatory compliance.

Antonio has over 20 years of experience auditing Public Key Infrastructure (PKI), specifically Certification Authority (CA) root key generations, WebTrust for CAs, and leading Third Party reporting over CA systems.

With a broad client service background he's overseen large national and multinational engagements related to SOX, internal audit reporting, regulatory compliance, process and systems redesign and internal controls assessment and remediation.
