

Eric Cohen is the proprietor of Cohen Computer Consulting, a consultancy focused on emerging accounting and audit technologies, including audit data standards, artificial intelligence (AI) and machine learning, blockchain and distributed ledger technologies, continuous audit, RPA, and XBRL. He is a co-founder of XBRL and chief architect of XBRL's Global Ledger Taxonomy Framework (XBRL GL). As an ambassador of XBRL, he has worked in cooperation with virtually every other standards effort working on accounting and audit data; he served as Domain Coordinator for the United Nations CEFACT Accounting and Audit Domain and is a Canadian national expert to the ISO; he serves as the vice chair to the Canadian mirror committee on blockchain technologies. He also sits on the ITU-T (International Telecommunication Union Telecommunication Standardization Sector) Digital Currency Global Initiative. Eric has served on numerous study groups and committees for CPA Canada, the AICPA and the New York State Society of CPAs; he is a member of the NYSSCPA Digital Assets Committee.
