

Jamie Freiman, Marist College, Jamie earned his PhD at Rutgers University where he studied Accounting Information Systems. His background prior to that includes an MS in Accounting and BA in Economics from Binghamton University. Jamie is currently an Assistant Professor of Accounting at Marist College. His research interests generally include applications of technology toward a more efficient, accurate, and continuous audit paradigm. More specifically he focuses on tackling big data problems in audit through the use of full population and weighted suspicion scoring approaches. His interests also include incorporating blockchain technology into the accounting data world as well as improving and developing new internal control systems.
