

Supplementary Information Form

Question 1.

In order to permit the Admissions Committee more flexibility and to achieve greater success in placement, please study our website and indicate below your preference of research area.

Question 2.

Do you prefer experimental or theoretical research, or are you undecided?

Question 3.

If openings are not available in your chosen area(s) as indicated above, would you be willing to accept an offer in an area that has openings? (yes or no)

Question 4:

Scholarly Contributions REFEREED (Do not include your thesis, work term reports or any articles that are currently in progress or those on which you do not appear as an author.)

Using the format below, number and list your scholarly contributions including: articles published, accepted or submitted (provide submission number) to refereed journals; other refereed contributions including: papers in refereed conference proceedings, posters

Required Format: full authorship as it appears/will appear in the original publication, year, title, publication name, volume, page number(s), and chapters if applicable. For example:

- 1) MacMillan, J., Applicant, X.X., and Mussar, H. (2008) Chemical composition in potions in Harry Potter. Journal of Alchemy. 269: 1120-1124 (PhD work).

Question 5:

Scholarly Contributions – NON REFEREED (Do not include your thesis, work term reports or any articles that are currently in progress or those on which you do not appear as an author.)

Using the format below, number and list your scholarly contributions including: specialized publications and conference presentations and posters; contributions resulting from your participation in industrial relevant Research and Development activities; patents and copyrights awarded such as software (include title and name of joint inventors).

Required Format: full authorship as it appears/will appear in the original publication, year, title, publication name, volume, page number(s), and chapters if applicable. For example:

- 1) MacMillan, J., Applicant, X.X., and Mussar, H. (2008) Chemical composition in potions in Harry Potter. Journal of Alchemy. 269: 1120-1124 (PhD work).

Question 6:

Scholarships & Awards

List a maximum of 10 competitive postsecondary scholarships, fellowships, prizes and other academic or professional awards you have received and think would be the most pertinent to the adjudication of your application.

Question 7.

In 250 or fewer words succinctly state your research interests and goals, and how you intend to achieve them.
