Change request implementation scheduling	Nevil
LAPS implementation and auditing	Nevil
Adobe DC testing	Nevil
Office Crashes	Stephen

Stalled Items	

Standing Items	
AD Consolidation Update	Nevil

Agenda

AHS - Lowell

- Rebuilt all labs on a schedule (very hands off)
  - Very successful with SCCM
- Working on Windows 10 development
- uPrint has been deployed for graduate students in RLS

Arts – Nevil

- DFS replication of N drive server

- LAPS testing

Computer Science - Steve

-

Engineering – Ray

-

Environment – Bernie

- ENV has a new SCCM distribution point that was used extensively during the fall rebuild
- As of this term, ENV lab computers are getting all their applications from SCCM, not GPO

IST - Dave

-

IST – Manfred

- LAPS implemented to all Academic Support PCs Sep 15th
- SCCM server needs to be updated to support W10. Testing is underway in our test env, but will take time as it requires new versions of SQL and significant upgrades.
- All podium PCs were successfully rebuilt again this term. 17 major packages and numerous minor ones of the over 60 were updated.
- Testing is complete and migration is proceeding for about 90 UW Finance users to a secure VDI platform. We expect this highly controlled environment to be used for about 2 years until the new Web-based SW is in place.
- At time of writing, over 60 clients have downloaded the W10 ISO image from our WebStore.
- We have a W10 IST base "image" finished and demo W10 VDI PCs for people to start testing. The focus so far is entirely on testing and upgrades of primary workstations is not encouraged or recommended at this time, but experience with apps has been good.

IST – Security Mike

-

Math – Hari

-

Science - Allan

-

IST - Ravindri

- Applications Reps from the Enterprise Systems Group(IST) are testing their Apps for compliancy with IE 11.
