

# WNAG

---

Meeting: 2015-07-15

Present: Arts - Nevil Bromley; CS - Steve Nickerson; ENG - Ray White; ENV - Bernie Rutter (secretary); IST - Manfred Griesbach, Dave Hinton, Anton Romantsov; Math - Hari Chotara.

## 1 Previous Business

1. Unlinked GPOs (Dave): 60% in ENG Ray will pass on to those involved
2. DC migration to private subnets - update (Dave): 1 DC (*calypso*) in private subnet - had a comm issue between it and other DC's, which was corrected; will start migrating the rest.
3. DC slowness (Dave): no reports for over a month. Ray will request from ENG any observations they have.
4. AD Logging (Dave, Anton): should be using new policies in 2012R2. Developed a plan to test on one DC to apply Microsoft-recommended policies and monitor performance and log growth New tools to monitor certain events not getting alerts they need due to existing policies. Need to increase log size and retention time per Microsoft recommendation. Tool usage: Manage Engine AD Audit, Netrix, SCOM.

## 2 Faculty Updates (round table)

**ENG:** New flooring in E5

**Arts:** SCCM automation and training of support people.

Issues with ONA lockdown and online midterms: Problem also in ENG and SCI. Disabled lockdown tool and Exam worked fine. Problem was google analytics and a java site. Exam was also accessing something that D2L claimed was internal to learn but which could not be accessed. Other issues have occurred when the CAS server IPs had been changed without notice  
**Manfred/Dave:** Possibly look at a VDI solution for troubleshooting and testing.

**ENV:** Nothing to add

**Math:** Drive encryption?

Arts default Win7 Psych something else Most are using native tools (bitlocker, etc). Opencrypt for files in ENG.

(unsure who) Campus PKI? Good question for MikeP. Dave looking at setting up a CA in Nexus through globalsign to streamline cert renewals. General consensus is that 1 year renewals are onerous

**Manfred** for IST Workstations

Suggestion - software updates: Propose that Mike Cocker does update versions as he sees new ones. Manfred has a podium update list that he sends to faculty and will copy WNAG will send out in a week

Advanced firewall now in use in Arts and IST managed by SCCM

Production Advanced Firewall GPO applied to OU under IST can check it out there

N drive change Email notifications going to undergrads on acceptance to UW even though the drive moving from “blank” to “\\files...”

### **3 New Business**

1. CryptoWall: submitted to group by email by Mike Patterson. Are people interested in hearing more about it? Contact Mike.
2. (Related to above) Blocking binaries/scripts from default windows archive directories: WNAG email thread. Ray would accept a targeted GPO but not applied at the top. Needs more discussion.
3. LDAP requests requiring a trusted source: Yes.
4. AD consolidation: still deleting ADS accounts. 15K accounts a day with WatIAM. 2 weeks remain for expired accounts, then applicant user accounts. New Employees still being added to ADS.
