

## **WNAG**

### **Meeting: 2018-01-18**

Present: Jim Johnston (Chair), Bernie Rutter (Secretary), Allan Fleming, Nevil Bromley, David Aldwinckle, Mike Patterson, Ravindri Kulatunga, Linda Zhang, John Mayall

### **John Mayall presented on IST's Microsoft BitLocker Administration and Monitoring (MBAM) deployment.** These are the highlights:

- IST currently has 70 notebooks enrolled. They are only deploying to notebooks at this time
- The MBAM Client is deployed via SCCM
- Client Settings are managed by GPO
- There is a portal for administrators, helpdesk staff, Report users and self-serve for end users
- Exemptions are handled by GPO and group membership
- Encryption used is XTS-AES 256bit
- If an existing machine is 128bit, it will need to be manually unencrypted then MBAM will re-encrypt with 256bit
- TPM chip allows boot without password
- Client machines will encrypt in the background
- John will arrange a training session for those wishing to use the campus MBAM for BitLocker management

### **Other Business**

Nevil: Arts is now deploying UE-V using rules they configured in Arts

Jim: Math is also moving to UE-V – in teaching environment this week. Planning to implement UE-V in research areas.

Ravindri: Linda Zhang will be taking over Ravindri's WNAG duties when Ravindri retires in August. Linda will be shadowing Ravindri for the next while
