What's happening in the WCMS?

We now have 11 WCMS 3 sites launched!
- Architecture and Design Research
- Building the next WCMS
- Chemical Engineering Graduate Student Association
- Civil and Environmental Engineering Information Technology
- Civil, Environmental, Architectural and Geological Engineering Society
- Electrical and Computer Engineering Graduate Student Association
- Hagey Lectures
- Impact Mechanics Material Characterization
- Nanomri Conference
- System Design Engineering Graduate Student Association

Training and support update:
- Core content, activities, quizzes and FAQs completed for the WCMS 3 Fundamentals and WCMS 3 Web Forms courses
- Progressing towards training site solution
- We are limiting creating images and screenshots for features that are still being developed
- Video production for basic tasks will be started this week and added to our Youtube channel
- How-to documents continue to be updated as WCMS 3 evolves

WCMS 3 information on Web Resources site reminder
WCMS 3 migration and user information is now available! Wondering where to start?
- Take a look at our migration resources and answers to some common migration and technical questions on the Web Resources website
- Read information on the migration process and requesting a WCMS 3 site
  - WCMS 3 site request intake web forms opened on June 29, with those links shared via a campus-wide communication
  - The web form will automatically create a corresponding RT, where all further communications about your migration will occur
- Keep an eye on our WCMS 3 training and support page – WCMS 3 LEARN courses are not yet available, but this page will be updated on an ongoing basis as WCMS 3 development continues
- Get an early look at WCMS 3! Take a look at our WCMS 3 for site maintainers YouTube playlist for two new WCMS 3 videos - with more to come!
- See the list of the functionality from standard WCMS 2 FDSU sites that will and will not be available in the current release
- Stay up-to-date with our post-launch development work and project timeline information

WCMS 2 site information

Reminder: Deadline for launching WCMS 2 sites on pilots

All WCMS 2 FDSU pilots sites must be launched/moved to production by Tuesday, August 31, 2021. This does not impact sites using single page, publication or conference templates.

If a site is not ready to move to production at that time, the site may:

- Be culled (deleted), with recommendation for the site owner to recreate the site in the WCMS 3 staging area

Requests to keep WCMS 2 sites on pilots after August 31 should be sent to Joe Kwan. Requests will be reviewed on a per-site basis; there is no guarantee an exclusion will be granted.

Creating new WCMS 2 sites

WCMS 2 FDSU sites are no longer being built as of June 29, 2021. Site maintainers requiring a new WCMS site will need to build the site in the new WCMS 3 environment.

Site requests for single page, publication or conference templates will continue to be supported until the functionality is available in WCMS 3.

Drop-in lab

Have a question, or need some help with your website? A virtual Drop-in lab will be open every Tuesday and Thursday afternoon from 1-4 p.m. to provide WCMS content maintainers one-on-one website and training support. Please reach out to Charlotte Armstrong, via email or Microsoft Teams, to schedule an appointment.
