

## WCMS training and support update

### WCMS 3 updates

10 new sites have launched in the new WCMS 3! Continue to check out the growing list on our [Web Resources sites and templates](#) page to see some of the new features and design offered in WCMS 3!

### WCMS 3 Fundamentals course

The Waterloo Content Management System (WCMS) 3 training course, WCMS 3 Fundamentals, is now available!

- Self-registration in LEARN is now open
- Please allow for **up to one business day** following your registration to allow for the creation of your individual training site
- Training sites will be provisioned for a period of **four months** following their creation, if you still require your site beyond that please contact the Training and Support team as the end date nears
- Training (and [how-to documents](#)) will be continually updated as features are added to WCMS 3

### WCMS 3 migration update

- On Monday we received the latest set of bug fixes from EW and are planning on completing QA by the middle of next week
- We are also prepping “remediation training” to help those who are interested and willing, and whose sites make sense to run through the current version of the migration scripts
- We are aiming to reopen migration form we’ve temporarily closed, and have “remediation training” ready towards the end of the month

### IST co-op rebuild opportunities in WCMS 3

Are you interested in having a [co-op student rebuild an existing WCMS 2 site](#) in WCMS 3? We would like to continue to identify "simple" WCMS 2 sites that the co-ops can use as examples to get more hands-on experience with WCMS 3 and assist with the migration process. "Simple" sites in this case would constitute sites:

- That are stock "FDSU" theme in WCMS 2, with no custom modules installed and are not behind authentication; and
- That have 30 pages or less in total

The website lead can submit sites that fit our criteria for a "simple" site by completing the [Request a new WCMS 3 site web form](#) and selecting the "Manual migration of existing WCMS site by WCMS co-ops" option. Please review the [release comparison](#) information to ensure current functionality is supported in WCMS 3.

## Drop-in lab

A [virtual Drop-in lab](#) will be open every Tuesday and Thursday afternoon from 1-4 p.m. to provide WCMS content maintainers one-on-one website and training support. Please reach out to Charlotte Armstrong, via [email](#) or Microsoft Teams, to schedule an appointment.
