INSPIRE GIRLS TO CHANGE THE WORLD.

Technovation is a global program that introduces youth (girls, trans, gender non-binary) to computing via tech entrepreneurship. With the support of volunteer mentors, students work in teams to code mobile apps or AI solutions that address real-world problems they’ve identified.

Women in Computer Science (WiCS) runs the Waterloo Chapter of Technovation Girls. Last year, Technovation Girls from Waterloo identified problems in their communities and created 9 mobile apps/AI solutions to solve them. Participants produced tech solutions to address youth mental health and eating disorders, greener energy for residential homes, and more.

TECHNOVATION CHANGES GIRLS’ LIVES

76% of Alumnae are pursuing STEM degrees

60% of Alumnae are working in STEM careers

KEEP READING TO FIND OUT HOW YOU CAN GET INVOLVED IN THE 2023 SEASON!
To support girls along their path, Technovation Girls Waterloo organizes several in-person workshops and events. Hosting a workshop is a great way to showcase your company.

**Hosting a workshop involves providing:**
- the event space
- equipment
- if possible, a water dispenser for refreshments for attendees

The requirements for the hosting facility can vary but generally include:
- number of people: anywhere between 100–200 attendees
- Microphone, projector, means of displaying the screen of a mobile phone
- Wi-Fi
- Charging stations where the attendees can charge their laptops and mobile phones
- tables and chairs to use as workspaces
- A space for eating and drinking
- Parking nearby

**We provide:**
- food/snacks
- workshop/event content
- promotion of the event to students
- registration and logistics
