Disclaimer: I'll be focusing on software co-ops.

01

Resume

What do I put on my resume?

Courses

Languages and projects from your courses

Extracurriculars

Leadership, research, clubs, design teams

Projects

Hackathons, side projects

Tips

Get your resume reviewed

- **Student societies** will have resume reviews depending on which faculty/program you're in (MathSoc, EngSoc, SESoc)
- **WiCS** holds resume reviews in partnership with companies
- Reach out to **upper years**: "Hi, I'm X, I'm starting to apply for my first co-op, and I would appreciate any feedback on my resume"

Formatting

- Keep your resume to **1 page**
- Have a dedicated section for **technical skills** (coding languages & tools)
- Have impact focused bullet points in **XYZ format**: "Accomplished [X] as measured by [Y] by doing [Z]"

| Jake Ryan 123-456-7890 jake@osu.edu linkedin.com/in/jake github.com/jake | |
| EDUCATION | |
| Southwestern University <i>Bachelor of Arts in Computer Science, Minor in Business</i> | Georgetown, TX Aug. 2018 - May 2021 |
| Blinn College <i>Associate's in Liberal Arts</i> | Bryan, TX Aug. 2014 - May 2018 |
| EXPERIENCE | |
| Undergraduate Research Assistant <i>Texas A&M University</i> | June 2020 - Present College Station, TX |
| <ul style="list-style-type: none">• Developed a REST API using FastAPI and PostgreSQL to store data from learning management systems• Developed a full-stack web application using Flask, React, PostgreSQL and Docker to analyze GitHub data• Explored ways to visualize GitHub collaboration in a classroom setting | |
| Information Technology Support Specialist <i>Southwestern University</i> | Sep. 2018 - Present Georgetown, TX |
| <ul style="list-style-type: none">• Communicate with managers to set up campus computers used on campus• Assess and troubleshoot computer problems brought by students, faculty and staff• Maintain upkeep of computers, classroom equipment, and 200 printers across campus | |
| Artificial Intelligence Research Assistant <i>Southwestern University</i> | May 2019 - July 2019 Georgetown, TX |
| <ul style="list-style-type: none">• Explored methods to generate video game dungeons based off of <i>The Legend of Zelda</i>• Developed a game in Java to test the generated dungeons• Contributed 50K+ lines of code to an established codebase via Git• Conducted a human subject study to determine which video game dungeon generation technique is enjoyable• Wrote an 8-page paper and gave multiple presentations on-campus• Presented virtually to the World Conference on Computational Intelligence | |
| PROJECTS | |
| Gititytics <i>Python, Flask, React, PostgreSQL, Docker</i> | June 2020 - Present |
| <ul style="list-style-type: none">• Developed a full-stack web application using flask serving a REST API with React as the frontend• Implemented GitHub OAuth to get data from user's repositories• Visualized GitHub data to show collaboration• Used Celery and Redis for asynchronous tasks | |
| Simple Paintball <i>Spigot API, Java, Maven, TravisCI, Git</i> | May 2018 - May 2020 |
| <ul style="list-style-type: none">• Developed a Minecraft server plugin to entertain kids during free time for a previous job• Published plugin to websites gaining 2K+ downloads and an average 4.5/5-star review• Implemented continuous delivery using TravisCI to build the plugin upon new a release• Collaborated with Minecraft server administrators to suggest features and get feedback about the plugin | |
| TECHNICAL SKILLS | |
| Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R | |
| Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI | |
| Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse | |
| Libraries: pandas, NumPy, Matplotlib | |

02

Applying

Where to apply?

WaterlooWorks

- 2 job boards: full cycle service + employee student direct
- Rank/match: employers rank students & students rank them back

LinkedIn

Set countrywide job alerts

- Keyword: “summer 2026 intern” country: “canada”
- Note: winter term may be called spring by some companies

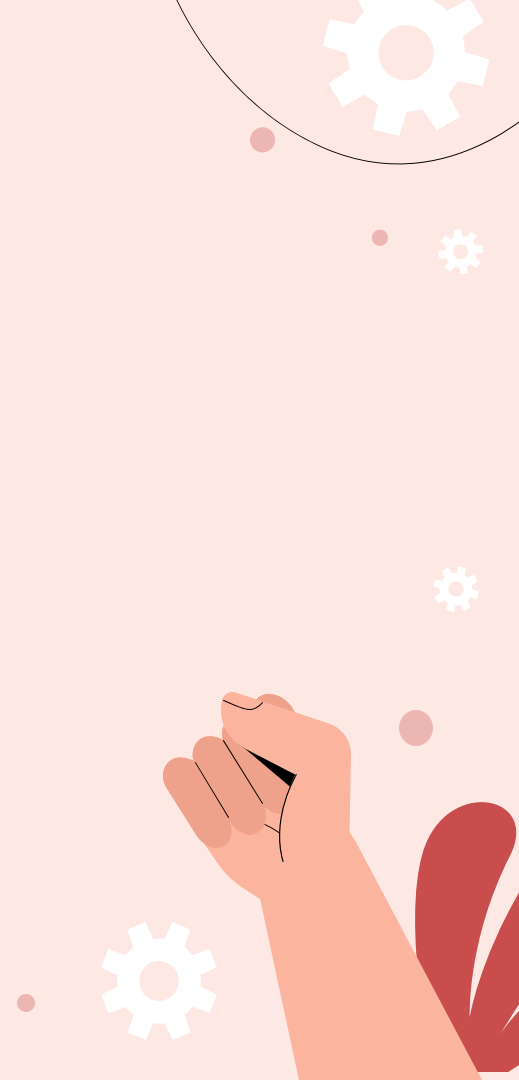

GitHub Lists

Collection of internship listings

<https://github.com/SimplifyJobs/Summer2026-Internships>

Tips on applying

- Start early
- Expect to be rejected especially when applying externally. Do not count rejections and do not take them personally
- You may need to apply to 100s of jobs to land interviews. Don't be too picky and dedicate a good amount of time to applying
- Prioritize learning opportunities over superficial factors like prestige or pay

03

Connecting

Connecting with employers

Club/society Sponsors

Groups like WiCS have several events with company representatives and recruiters.

Employer Info Sessions

Sign up through WaterlooWorks and attend events to meet employers

Hackathons

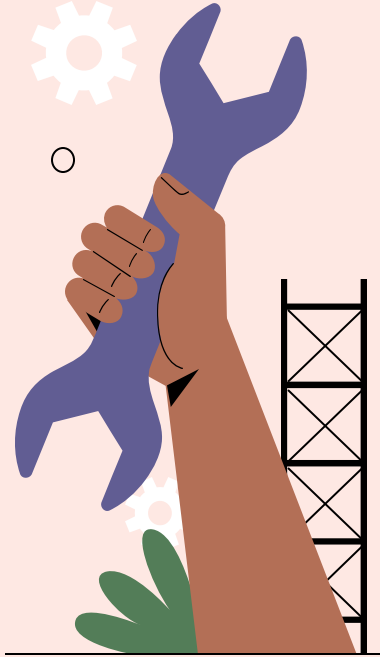

Hackathons will typically have a sponsor bay with recruiters and sometimes special application links

Rewriting the Code

Great community & resource to find events, workshops, learn about opportunities

LinkedIn

Put yourself out there and companies may reach out!

04

Interview Prep

Interviews

Technical

Common types

Online
Assessments

Live
coding
problem

Trivia/knowledge
based

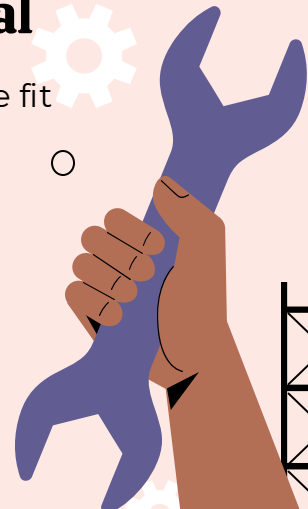

Less common

Take home project

System design

Non-technical

Behavioural & culture fit

mastering technical interviews!

Learn the basics

Get used to the syntax
of some language
(preferably less wordy
ones like Python)

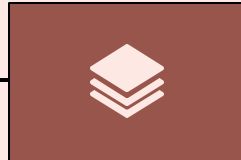

Data Structures & Algorithms

Learn more over time, pay
attention to relevant courses

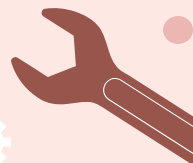

Practice

Start with easy
questions to get used
to problem solving

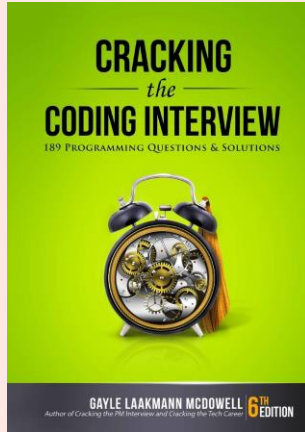

Communicate

Mock interviews;
practice talking out
loud through
problems

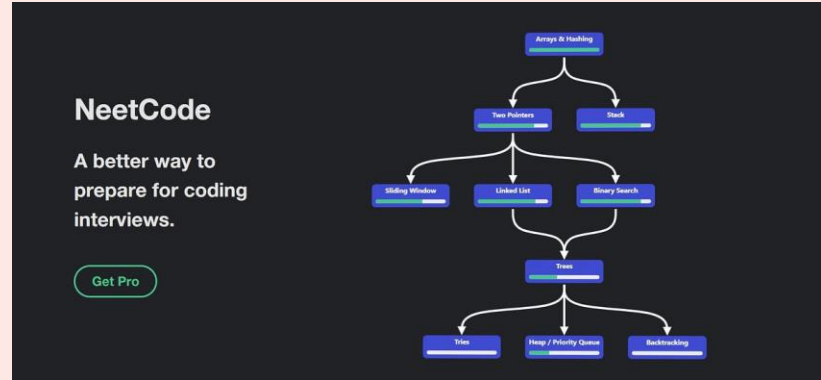

Learning Resources

Read!

Watch!

<https://neetcode.io/>

Practice Resources

LeetCode

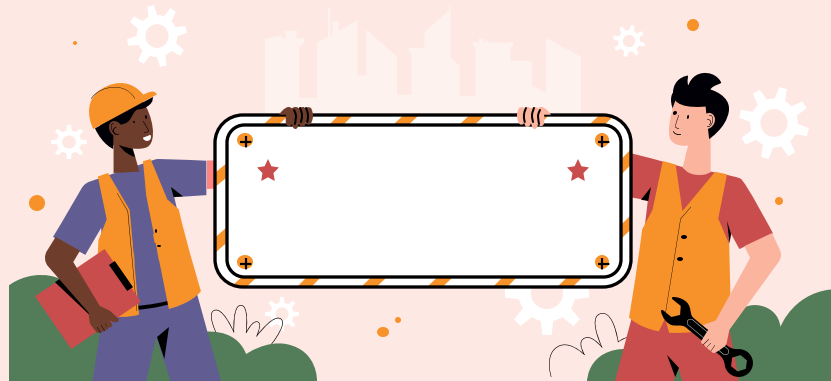

Can find company specific questions & study plans

Grind75

Customize leetcode study plan based on schedule, difficulty, and topics

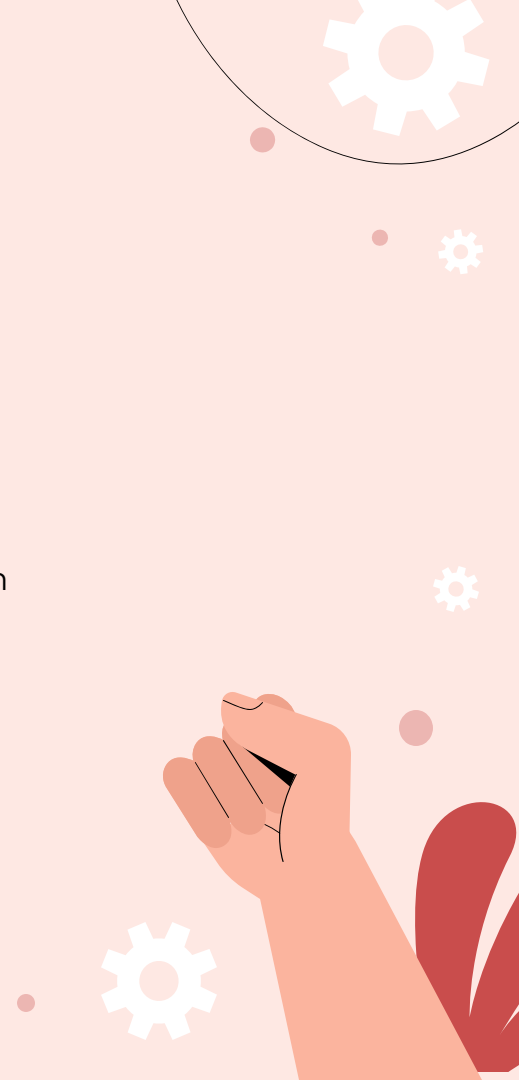

Peers

Do mock interviews with friends, upper years, others in your network

Notes on behavioural

- Do NOT undersell yourself, be confident in your skills
- Keep a document of your general answer to typical questions and review before each interview
 - Tell me about yourself
 - Tell me about a project / technical challenge
- Research the company and role well. Ask meaningful questions. Learn from the interviewer's personal experience at the company.
- Know your resume well, you may be asked to elaborate on skills or points you have

Thanks!
